Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the post-census data publication process. The Bureau was guided by Director, **Bruce Chapman**, and Deputy Director, **C. L. Kincannon**. Primary direction of the data publication program was performed by **William P. Butz**, Associate Director for Demographic Fields, assisted by **Peter A. Bounpane**, Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Bailar**, Associate Director for Statistical Standards and Methodology, **Howard N. Hamilton**, Acting Associate Director for Information Technology, **James D. Lincoln**, then Associate Director for Administration, and **Stanley D. Moore**, Associate Director for Field Operations. The Director's staff was assisted by **Sherry L. Courtland**. Direction of the census enumeration and early processing activities was provided by **Vincent P. Barabba**, former Director; **Daniel B. Levine**, former Deputy Director; and **George E. Hall**, former Associate Director.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census was in the Decennial Census Division under the direction of **Stanley D. Matchett**, Chief, assisted by **Rachel F. Brown** and **Roger O. Lepage**, Assistant Division Chiefs. The following Branch Chiefs were responsible for support services: **Donald R. Dalzell**, **H. Ray Dennis**, **Stephen E. Goldman**, **Dennis W. Stoudt**, and **Richard R. Warren**. The Outlying Areas Branch was under the direction of **Irma F. Harahush**, Acting Branch Chief.

Data collection was carried out by the government of each Area through a special agreement with the following Governors or High Commissioner: Honorable **Peter T. Coleman**, Governor of American Samoa, assisted by **Joseph M. Pereira**, Census Coordinator; Honorable **Paul M. Calvo**, then Governor of Guam, assisted by **Joseph T. Flores**, Census Coordinator; Honorable **Carlos S. Camacho**, then Governor of the Northern Mariana Islands, assisted by **Jose C. Ayuyu**, Census Coordinator; Honorable **Adrian Winkle**, then High Commissioner of the Trust Territory of the Pacific Islands, assisted by **Haruo Esang**, Census Coordinator; and Honorable **Juan Luis**, Governor of the Virgin Islands of the United States, assisted by **Frank Mills** and **Edward A. Phillips**. The following Census Bureau employees were designated as Census Advisors to oversee data collection activities in the various areas: **Melvin A. Handry**, Advisor for the Virgin Islands of the United States, **Michael J. Levin**, Advisor for the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands, **Guy A. Lutz**, Advisor for Guam and the Trust Territory of the Pacific Islands, excluding the Northern Mariana Islands, and **C. Kemble Worley**, Advisor for American Samoa.

The computer programming necessary to prepare this report was accomplished in the Agriculture Division under the general supervision of **John H. Barry**, Chief. The systems design and computer programs were the direct responsibility of **John E. Adkins**, assisted by **Lowell Wrucke**, **Linda Hutton**, and **Thaddeus Hess**.

Responsibility for developing the population portion of the 1980 census questionnaire content and designing the tabulations in this report was in the Population Division, under the supervision of **Roger A. Herriot**, Chief, **Paula J. Schneider**, Staff Assistant for Census Programs, **Gordon W. Green, Jr.**, **Nampeo D. McKenney**, and **Arthur J. Norton**, Assistant Division Chiefs. This report was prepared by **Cynthia M. Taeuber**, assisted by **Michael J. Levin** and **Peggy Payne**.

Administration support was provided by the Administrative Services Division, **Robert L. Kirkland**, Chief, and **William C. Fanning**, Assistant Chief.

Computer processing was performed in the Computer Operations Division, **C. Thomas DiNenna**, Chief, **James E. Steed**, **George M. Bowden**, and **Joseph J. Sferrella**, Assistant Chiefs.

Questionnaire processing procedures were developed in the Decennial Processing Staff, **James S. Werking**, then Chief, under the direction of **Harry O'Haver**, then Assistant Chief. The clerical coding and microfilming of the sample questionnaires were performed at the Laguna Niguel Processing Office, **Robert N. Scheller**, Chief.

User services were provided by the Data User Services Division under the supervision of **Michael G. Garland**, Chief, **Marshall L. Turner, Jr.**, and **Paul T. Zeisset**, Assistant Chiefs.

Data collection activities were supervised in the Field Division by **Lawrence T. Love**, Chief, under the direction of **Richard Blass**, **Charles Hancock**, and **George T. Reiner**, Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

Geographic programs and plans were developed in the Geography Division under the direction of **Joseph J. Knott**, **Robert W. Marx**, and **Silla G. Tomasi**, Assistant Chiefs, and **Donald I. Hirschfeld**, Special Assistant.

Publications editing, design, composition, and printing procurement were performed by the staff of the Publications Services Division, **Raymond J. Koski**, Chief; **Milton S. Andersen**, **Arlene C. Duckett**, and **Gerald A. Mann**, Branch Chiefs.

The Statistical Methods Division was largely responsible for developing new procedures to obtain a more accurate count of the population. This work was supervised by **Charles D. Jones**, Chief; **David V. Bateman**, then Assistant Chief; and **Susan M. Miskura** and **Robert T. O'Reagan**, Assistant Chiefs.

The system design, technical specifications, assembly, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of the Technical Services Division, **C. Thomas DiNenna**, Acting Chief, and **Robert J. Varson**, Branch Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

Introduction

GENERAL

This report is part of the *General Social and Economic Characteristics* series and presents data from the 1980 Census of Population on social and economic characteristics of the residents of the Virgin Islands of the United States, its islands, island subdivisions, places, and certain other geographic areas (e.g., urban and rural portions of the Area). The abbreviated identification for this report is PC80-1-C (i.e., Population Census, 1980-Volume 1-Chapter C) followed by the number 55 representing the Virgin Islands of the United States. A large portion of the information compiled from the 1980 Census of Population will appear in Volume 1, *Characteristics of the Population,* of which this report is part. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The population figures for the various geographic entities shown here may differ from those shown in the *Advance Report,* PHC80-V. The changes reflect corrections of errors found after the PHC80-V report was prepared. The changes may affect any geographic area shown in this report.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census and consultation with a wide variety of users of census data. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes, however, do not affect to any appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability for specific subjects appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains a text (this introduction and five appendixes), a table of contents, detailed tables, and maps. A general location map and an outline map of the Virgin Islands appear after the table of contents.

Each detailed table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title. The first table in this report is table 23; tables 1 to 13 appear in the *Number of Inhabitants,* PC80-1-A report for this Area and tables 14 through 22 appear in the *General Population Characteristics,* PC80-1-B report for this Area. Data are presented in this report on a broad spectrum of social and economic information collected in the 1980 Census of Population, including age, race, Spanish origin, marital status, household relationship, education, labor force, occupation, industry, income, and poverty.

Appendix A describes the various area classifications (e.g., urban and rural residence, minor civil divisions, and places). Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix D presents information on the sources of error in the data, editing procedures, and a description of allocation and substitution. Appendix E contains facsimiles of the 1980 census questionnaire pages.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash "–" represents zero or a percent which rounds to less than 0.1.
- Three dots ". . ." mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")
- (NA) means not available.
- (CDP) is census designated place.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Bureau of the Census takes precautions to make sure that its published data do not disclose information about specific individuals and housing units. To accomplish this, the Census Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

The general rules of primary suppression are as follows: counts of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 15 or more persons in the geographic area;

counts of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are five or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least five occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least five or the number of renters is also at least five. These primary suppression criteria are applied independently of one another.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This level requires that the 15-person or the 5-housing unit criteria stated above be applied individually to each race or Spanish origin category.

Finally, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.

Appendix A.—Area Classifications

STATE EQUIVALENTS

The 50 States and the District of Columbia are the constituent units of the United States. The Virgin Islands of the United States is treated as a State equivalent in the text and tables of the PC80-1-C report.

COUNTY EQUIVALENTS

In most States, the primary divisions are termed counties. In the Virgin Islands of the United States, the comparable areas are the three major islands.

COUNTY SUBDIVISION EQUIVALENTS

In reports for the States, statistics are presented for subdivisions of counties or equivalent areas. In the Virgin Islands of the United States, statistics are presented for minor civil divisions. A series of tables paralleling those for places and identified with an "a" suffix presents data for minor civil divisions.

In the States, MCD's are primary divisions of counties established under State law. MCD's in the Virgin Islands of the United States are called census subdistricts. They were established by local law for the 1980 census to replace the quarters and cities that were used in the 1970 census.

PLACES

Two types of places are recognized in the State census reports—incorporated places and census designated places—as defined below.

Incorporated Places

Incorporated places recognized in the State census reports are those which are incorporated under the laws of their respective States as cities, boroughs, towns, and villages. There are no incorporated places in the Virgin Islands of the United States.

Towns in the Virgin Islands of the United States are not legally incorporated. The three places specified as towns in the Virgin Islands Code have legally established boundaries and purposes, but are not functioning governments.

Census Designated Places

As in previous censuses, the Census Bureau, in cooperation with local governments, delineated boundaries for closely settled population centers without corporate limits. In 1980, the name of each such place is followed by "(CDP)," meaning "census designated place." Six CDP's have been designated in the Virgin Islands of the United States. To be recognized for the 1980 census, CDP's in the Virgin Islands of the United States must have a minimum 1980 population of 300.

URBAN AND RURAL RESIDENCE

The urban population consists of all persons living in places of 2,500 or more inhabitants. The population not classified as urban constitutes the *rural* population.

AREA MEASUREMENTS

Area measurement figures for the three islands are available in table 2 of the PC80-1-A report for the Virgin Islands of the United States.

GENERAL

The 1980 census of the Virgin Islands of the United States, was conducted through direct interview. Enumerators visited and listed every housing unit asking the questions as worded in the questionnaire and recording the answers. Responses were determined by the questionnaire and the instructions given to the enumerator. The definitions and explanations given below for each subject are drawn largely from various technical and procedural materials used in the collection of the data. These materials helped the census enumerators to understand fully the intent of each question, and thus to resolve problems on unusual cases in a manner consistent with this intent. Also included is certain explanatory information to assist the user in the proper utilization of the statistics.

Facsimiles of the questionnaire pages used to produce the data shown in this report are presented in appendix E.

HOUSEHOLD, RELATIONSHIP TO HOUSEHOLDER, FAMILY, AND GROUP QUARTERS

Household

A household includes all the persons who occupy a housing unit. A housing unit is a house, an apartment, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall.

The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on Group Quarters). The actual classification of a housing unit as a household depends on entries in question 2 and item B on the census questionnaire. Item B on type of unit or quarters was filled by an enumerator or a census office clerk for each housing unit or group quarters.

The measure "persons per household" is obtained by dividing the number of persons in households by the number of households (or householders).

Relationship to Householder

The data on relationship to householder were obtained from answers to question 2, which was asked of all persons in housing units. Only basic categories of relationship are recognized in this report. More detailed categories of relationship will appear in the PC80-1-D report.

When relationship is not reported for an individual, it is allocated according to the responses for age and marital status for that person while maintaining consistency with responses for other individuals in the household. The allocation procedure is described in Appendix D, "Accuracy of the Data."

Householder—One person in each household is designated as the "householder." In most cases, this is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member could be designated as the "householder." Two types of householders are distinguished—a family householder and a nonfamily householder. A family householder is a

householder living with one or more persons related to him or her by birth, marriage, or adoption. The householder and all persons in the household related to him or her are family members. A nonfamily householder is a householder living alone or with nonrelatives only.

Spouse—A person married to and living with a householder. This category includes persons in formal marriages as well as persons consensually married.

Child—A son, daughter, stepchild, or adopted child of the householder, regardless of the child's age or marital status. The category excludes sons-in-law and daughters-in-law. "Own children" are sons and daughters, including stepchildren and adopted children of the householder who are single (never married) and under 18 years of age.

The number of children "living with two parents" includes stepchildren and adopted children as well as sons and daughters born to the couple.

"Related children" in a family include own children and all other persons under 18 years of age in the household, regardless of marital status, who are related to the householder by birth, marriage, or adoption, except the spouse of the householder.

In a subfamily an "own child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

Other Relative—Any person related to the householder by birth, marriage, or adoption, who is not shown separately in the particular table (e.g., "spouse," "child," "brother or sister," or "parent").

Nonrelative—Any person in the household not related to the householder by birth, marriage, or adoption. Roomers, boarders, roommates, paid employees, wards, and foster children are included in this category.

Unrelated Indidivual

An unrelated individual is (1) a householder living alone or with nonrelatives only, (2) a household member who is not related to the householder, or (3) a person living in group quarters who is not an inmate of an institution.

Family and Subfamily

A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons in a household who are related to the householder are regarded as members of his or her family. A "married-couple family" is a family in which the householder and spouse are enumerated as members of the same household. Not all households contain families, because a household may be composed of a group of unrelated persons or one person living alone. The measure "persons per family" is obtained by dividing the number of persons in families by the total number of families (or family householders).

A subfamily is a married couple (husband and wife enumerated as members of the same household) with or without children, or one parent with one or more never-married children under 18 years of age, living in a household and related to either the householder or the householder's spouse. Members of a subfamily are also included among the members of a family. The number of subfamilies, therefore, is not included in the number of families.

Group Quarters

All persons not living in households are classified by the Bureau of the Census as living in group quarters. Two general categories of persons in group quarters are recognized:

Inmates of Institutions—Persons under care or custody in institutions at the time of enumeration are classified as "patients or inmates" of an institution regardless of their length of stay in that place and regardless of the number of people in that place. Institutions include homes, schools, hospitals, or wards for the physically or mentally handicapped; hospitals or wards for mental, tubercular, or chronic disease patients; homes for unmarried mothers; nursing, convalescent, and rest homes for the aged and dependent; orphanages; and correctional institutions.

Other—This category includes all persons living in group quarters who are not inmates of institutions. Rooming and boarding houses, convents or monasteries, and other living quarters are classified as "other" group quarters if there are 9 or more persons unrelated to the person listed in column 1 of the census questionnaire; or if 10 or more unrelated persons share the unit. Persons residing in certain other types of living arrangements are classified as living in "other" group quarters regardless of the number or relationship of people in the unit. These include persons residing in military barracks, on ships, or in college dormitories; patients in general or maternity wards of hospitals who have no usual residence elsewhere; staff members in institutional quarters; and persons enumerated in missions, flophouses, etc.

Military quarters include barracks or dormitories on base, transient quarters on base for temporary residents (both civilian and military), and military ships.

Comparability with 1970 Census Data—The 1980 definition of a household differs from that used in 1970 only in the change in the definition of a housing unit to eliminate the requirement that there be cooking facilities for the exclusive use of the household. The household reference person in 1970 was the "head of household" (the husband in married-couple families); for 1980 it was changed to "the household member (or one of the members) in whose name the house is owned or rented." In 1970, a unit in which 6 or more unrelated persons were living together was classified as group quarters; for 1980 that requirement was raised to 10 or more unrelated persons.

SEX

The data on sex were derived from answers to question 3. At the time of field review, most cases in which sex was not reported were resolved by determining the appropriate entry from the person's given name and household relationship. When sex remained blank, it was allocated according to the relationship to householder and the age and marital status of the person. The allocation procedure is described in Appendix D, "Accuracy of the Data."

RACE

The data on race were derived from answers to question 4. The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify. This is a modification of the 1970 census procedures in which race was obtained in most cases by the enumerator's observation. In this report, households and families are classified by the race of the householder.

For persons who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used. This is a modification of the 1970 census procedure in which the race of the person's father was used.

The category "Black" includes persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but reported entries such as Jamaican, West Indian, or African.

The category "White" includes persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a response such as French, British, Dutch, or Danish. In the 1980 census, persons who did not classify themselves in one of the specific race categories but marked "Other" and wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "Other" race category.

The category "Other" includes all races other than Black or White.

If the race entry was missing on the questionnaire for a member of a household, an answer was assigned in the computer according to the reported entries of race of other household members using specific rules of precedence of household relationship. If race was not entered for anyone in the household (excluding paid employees), the race of a householder in a previously processed household was assigned. This procedure is a variation of the general allocation process described in Appendix D, "Accuracy of the Data."

AGE

The data on age were derived from answers to question 5. Only the information in items 5b and 5c (on month and year of birth) was read into the computer. Answers to question 5a (on age at last birthday) were used during field review to fill any blanks in question 5c. The age classification is based on the age of the person in completed years as of April 1, 1980. The data on age represent the difference between date of birth and April 1, 1980.

The median ages shown in this report were computed on the basis of more detailed intervals than shown in the tables. If the median fell in the terminal category of an age distribution, the method of presentation was to show the initial age of the terminal category followed by a plus sign; thus, if the median fell in the category "85 years and over," it is shown as "85+."

In each census since 1950, the Bureau of the Census has assigned the age of a person when it was not reported. In censuses before 1950, persons of unknown age were shown as a separate category. In 1970 and 1980, assignment of unknown ages was performed by the allocation procedure described in Appendix D, "Accuracy of the Data."

MARITAL STATUS

The data on marital status were derived from answers to question 6. The marital status classification refers to the status at the time of enumeration. Persons classified as "now married" include those who have been married only once and have never been widowed or divorced as well as those currently married persons who remarried after having been widowed or divorced. Consensually married persons are those living in a marital union without a civil or religious matrimonial contract and are classified as now married; they are reported separately as "consensually married." Persons reported as separated are those living apart because of marital discord, with or without a legal separation. Persons whose only marriage had been annulled are classified as never married, and all persons under 15 years old are classified as never married. All persons classified as never married are shown as "single."

When marital status was not reported, it was allocated according to the relationship to householder, sex, and age of the person. The general allocation process is described in Appendix D, "Accuracy of the Data."

SPANISH/HISPANIC ORIGIN

The data on Spanish/Hispanic origin or descent were derived from answers to question 7. This question was asked in the Virgin Islands of the United States for the first time in 1980.

Persons of Spanish origin or descent are those who classified themselves in one of the specific Spanish origin categories listed on the questionnaire—Puerto Rican or Cuban—as well as those who indicated that they were of other Spanish/Hispanic origin. Persons reporting "other Spanish/Hispanic" origin are those whose origins are from Spain, Mexico, or the Spanish-speaking countries of Central or South America, or they are persons identifying their origin or descent as being Spanish, Spanish American, Hispanic, Latino, etc. Origin or descent can be viewed as the ancestry, nationality group, lineage, or country in which the person or person's parents or ancestors were born before their arrival in the Virgin Islands of the United States. Persons of Spanish origin may be of any race. In this report, households and families are classified by the Spanish origin of the householder.

Persons of more than one type of Spanish origin and persons of both a Spanish and some other origin who were in doubt as to how to report a specific origin were classified according to the origin of the person's mother. If a single origin was not provided for the person's mother, then the first origin reported by the person was recorded. If any household member failed to respond to the Spanish/Hispanic origin question, a response was assigned by computer according to available related information such as place of birth reported for the household member. If such information was not reported, origin was assigned from entries of other household members using specific rules of precedence of

household relationship. If no origin was reported for any household member (excluding a paid employee), then an origin was assigned from another household with a householder of the same race. This procedure is a variation of the general allocation process described in Appendix D, "Accuracy of the Data."

SCHOOL ENROLLMENT

The data on school enrollment were derived from answers to questions 8, and 9. Persons are classified as enrolled in school if they reported attending a "regular" school or college at any time between February 1, 1980 and the time of enumeration. Regular schooling is defined as pre-kindergarten, kindergarten, elementary school, and schooling which leads to a high school diploma or college degree. Schooling in trade or business schools, company training, or schooling obtained through a tutor was to be reported only if the course credits obtained were regarded as transferable to a regular elementary school, high school, or college. Children were included as enrolled in pre-kindergarten only if the school included instruction as an important and integral phase of its program. Children enrolled in "Head Start" programs, or similar programs sponsored by local agencies to provide preprimary education to young children, were included as enrolled in school. Persons who had been enrolled in a regular school since February 1, 1980, but who had not actually attended, for example, because of illness, were counted as enrolled in school. Schooling which is generally regarded as *not* "regular" includes that given in nursery schools which simply provide custodial day care; in specialized vocational, trade, or business schools; in on-the-job training; and through correspondence courses.

Public, Church-Related, or Other Private School—Persons who were enrolled in school were classified as attending a public, church-related, or other private school. In general, a "public" school is defined as any school which is controlled and supported primarily by a local or Federal government agency. A "church-related" school is defined here as a private school which is controlled or supported primarily by a religious organization. An "other private" school is defined as a school controlled or supported primarily by private groups other than religious organizations.

In using the public/private school distinction for college enrollment, some caution should be exercised, since the classification of individual schools may not be clear to respondents, and census data may differ considerably from administrative figures.

Level and Year of School in Which Enrolled—Persons who were enrolled in school were classified according to the level and year of school in which they were enrolled, reported in question 9. The levels which are separately identified in this report are pre-kindergarten, kindergarten, elementary school, high school, and college. Children in "Head Start" or similar programs were counted under "Pre-kindergarten" or "Kindergarten" as appropriate. Elementary school, as defined here, includes grades 1 to 8, and high school includes grades 9 to 12. Persons attending junior high school are reported in elementary school or high school according to their grade. The term "college" includes junior or community colleges, 4-year colleges, universities, and graduate or professional schools.

Comparability With Earlier Census Data—School enrollment questions in some form have been included on the census since 1917; grade attended was added in 1950. The wording of the type of school question was changed from parochial in 1970 to church-related in 1980 in an attempt to make the affiliation with a religious group clearer to respondents. The intention was to include all schools controlled by religious groups rather than only particular denominations or religions.

In the 1917 Census, taken as of November 1, only persons in school on November 1 were reported as enrolled. The corresponding question on schooling in the 1930 census applied to a somewhat longer period; the period since the preceding September 1. Furthermore, in these censuses the question was not restricted as to the type of school the person was attending. In 1940, the question referred to the period since the preceding March 1. In 1950, the reference period was changed to that between February 1 and the time of enumeration. The same reference period was used in 1960, 1970, and 1980.

The age range for which enrollment data have been obtained has varied for several censuses. Information on enrollment was recorded for persons 5 to 24 years old in 1940, for persons 5 to 29 years old in 1950, for those 5 to 34 years old in 1960, and for those 3 years old and over in 1970 and 1980. Most of the published enrollment figures relate to ages 5 to 24 in 1940, 5 to 29 in 1950, 5 to 34 in 1960, 3 to 34 in 1970, and 3 years old and over in 1980. The extended age coverage for the published enrollment data in the recent censuses reflects increased interest in the number of persons who are attending regular colleges and universities at older ages.

In the 1950 census, grade of enrollment was available for the first time; grade or year could be identified for elementary school through college. In 1960, kindergarten was separately identified and included with the regular enrollment figures. In 1970 nursery school enrollment was added to the levels of school separately identified. In 1980, nursery school was replaced by "pre-kindergarten."

Comparability With Data From Other Sources—Data on school enrollment are also collected and published by other Federal and local governmental agencies. This information is generally obtained from reports of school systems and institutions of higher learning and from other surveys and censuses. These data are only roughly comparable with data collected by the Bureau of the Census, however, because of differences in definitions, subject matter covered, time references, and enumeration methods.

YEARS OF SCHOOL COMPLETED

The data on years of school completed were derived from answers to questions 9 and 10. These questions on educational attainment applied only to progress in "regular" schools as defined under the definition for school enrollment. The first question called for the highest grade attended, regardless of "skipped" or "repeated" grades. Persons whose education was received in foreign school

systems or an ungraded school were expected to report the approximate equivalent grade in the regular school system. An instruction printed on the form, "If high school was finished by equivalency test (GED), mark '12'" (meaning grade 12), was to ensure that persons who dropped out of school before high school graduation but later earned a diploma with an equivalency test would be counted as high school graduates. Those diploma recipients who also attended college would be credited with college attendance as reported.

The second question on educational attainment asked whether or not the highest grade attended had been finished. It was to be answered "Finished," if the person had successfully completed the entire grade or year indicated in question 9. If the person had completed only part of the year, had dropped out, or failed to pass the last grade attended, the question was to be answered "Did not finish." If the person was still attending school in that grade, he or she answered "Now attending."

The number in each category of highest grade of school completed represents the combination of (a) persons who reported the indicated grade as the highest grade attended and that they had finished it, (b) those who had attended the next higher grade but had not finished it, and (c) those still attending the next higher grade. Persons who have not completed the first year of elementary school are classified as having no years of school completed.

"Percent high school graduates" includes persons who completed four years of high school by graduation or an equivalency test and persons who reported that they had attended some level of college.

Comparability With Earlier Census Data—Educational attainment questions in terms of years of school completed have been included on the census since 1950. In 1950, a single question was asked on highest grade of school completed.

The 1980 instruction for persons who received a high school diploma by passing an equivalency test was not included on past census questionnaires. Persons who took equivalency tests may or may not have been reported as high school graduates in earlier censuses; however, completing high school by such means was not as common in earlier decades as it was in the decade prior to the 1980 census.

Median School Years Completed—The median number of school years completed was computed on the basis of data tabulated in multiple-year intervals for years under 8 years completed and single-year intervals for 8 and above (e.g., completion of the 1st year of high school was treated as completion of the 9th year, completion of the 1st year of college, as completion of the 13th year, etc.). Persons completing a given school year were assumed to be distributed evenly within the interval from .0 to .9 of the year. In fact, at the time of census enumeration, most of the enrolled persons had completed at least three-fourths of a school year beyond the highest grade completed, whereas a large majority of persons who were not enrolled had not attended any part of a grade beyond the highest one completed. The effect of the assumption is to place the median for younger persons slightly below, and for older persons slightly above, the true median.

The same procedure for computing this median has been used in the 1950, 1960, and 1970 censuses. Because of the inexact assumption as to the distribution within an interval, this median is more appropriately used for comparing different groups and the same group at different dates than as an absolute measure of educational attainment.

PLACE OF BIRTH

The data on place of birth were derived from answers to question 11.

Respondents were instructed to report place of birth in terms of the mother's usual place of residence at the time of the birth rather than in terms of the location of the hospital if the birth occurred in a hospital. In this report, the population of the Virgin Islands is classified in the following groups: persons born in the Virgin Islands, persons born in Puerto Rico, persons born in the United States, persons born in other areas under U.S. jurisdiction, persons born abroad with at least one parent who is a U.S. citizen, and persons born elsewhere. Persons were asked to report their country of birth according to international boundaries as recognized by the United States Government on April 1, 1980. Since numerous changes in boundaries of foreign countries have occurred in the last century, some of these persons may have reported their country of birth in terms of boundaries that existed at the time of their birth or emigration, or in accordance with their own national preference. Selected countries of birth are shown in this report.

Place of birth was not allocated for the Virgin Islands of the United States. Persons not reporting place of birth are shown separately in the tables under "Place of birth not reported."

CITIZENSHIP AND YEAR OF IMMIGRATION

Data on citizenship and year of immigration were derived from answers to questions 12a and 12b, which were asked of persons who reported being born outside the Virgin Islands of the United States, Puerto Rico, or the United States and areas under U.S. jurisdiction. Persons who were born abroad or at sea and who had at least one parent who is a U.S. citizen, were to report themselves as "Born abroad of American parents." All other persons born abroad were classified as "born elsewhere."

Citizenship—Information on citizenship was used to further classify persons "born elsewhere" into two major categories: naturalized citizens of the United States and not citizens of the United States. If citizenship was not reported, response was assigned by computer using the responses of other persons based on year of immigration and country of birth.

Year of Immigration—Persons "born elsewhere" were to indicate in question 12b the period which covered the year they came to stay permanently in the Virgin Islands. If year of immigration was not reported, a response was assigned using the responses of other persons based on age and race.

PARENTS' PLACE OF BIRTH

The data on parent's place of birth were derived from answers to questions 13a and 13b. These questions were asked for

the first time in the 1980 census. Information on parents' place of birth was used to classify the population of the Virgin Islands according to the place where the person's parents were born, that is, whether one or both of the person's parents were born in or outside the Virgin Islands of the United States.

Persons with one or both parents born in a foreign country, were asked to report the country of birth according to international boundaries as recognized by the United States Government on April 1, 1980. Parent's place of birth was not allocated for nonresponse. Selected countries of birth are shown in this report.

LANGUAGE SPOKEN AT HOME AND ABILITY TO SPEAK ENGLISH

The data on language spoken at home and English ability were derived from answers to questions 14a, 14b, and 14c. These questions were asked for the first time in the 1980 census. They are intended to measure the extent to which languages other than English were currently being spoken and the number of persons who felt that their English ability was limited. The questions were not intended to determine which language was a person's main language or whether a person was fluent in the non-English language that he or she reported. Therefore, persons who reported speaking a language other than English may have also spoken English at home and they may have been more fluent in English than in the non-English language.

Language Spoken at Home—Persons were asked in question 14a whether they currently spoke a language other than English at home. Those persons who reported speaking a language other than English were asked in question 14b to report the language they spoke. Their answers were coded using a detailed language list which distinguished approximately 400 languages. In the tables in this report only a few major languages could be shown separately. The remaining languages which were reported specifically by persons were grouped in an "Other specified language" category.

When the language was not on the detailed language list or when a person failed to report any language, and it could not be allocated based upon other information supplied by the person, the response was included in the "Unspecified language" category.

Ability to Speak English—Persons who reported that they spoke a language other than English at home were also asked in question 14c to characterize their ability to speak English. These responses were subjective, they were the person's own perception of his or her own ability or, because typically one person served as the informant for an entire household, may have represented the perception of another household member.

RESIDENCE IN 1975

The data on residence in 1975 were derived from answers to questions 15a and 15b. Persons living in the Virgin Islands of the United States in 1975 were asked to report the island in which they were living. Persons living in the United States were also asked to report the State in which they were living. All others were asked to report the country in which they were living. Residence in 1975 is used in conjunction with current residence to determine the extent of residential mobility of the population. When no information on residence in 1975 was collected for a person, information for other family members was used, if available. All cases of nonresponse, or incomplete response not assigned based on information from other family members, are shown separately as "residence in 1975 not reported."

The number of persons who were living in a different house in 1975 is somewhat less than the total number of moves during the 5-year period. Some persons in the same house at the two dates had moved during the 5-year period but by the time of enumeration had returned to their 1975 residence. Other persons who were living in a different house had made one or more intermediate moves. For similar reasons, the number of persons living on a different island may be understated.

Similar questions on mobility were asked in the 1970 census. In the 1970 census the question did not ask for specific island of residence within the Virgin Islands like question 15b in the 1980 census.

RESIDENCE OUTSIDE THE VIRGIN ISLANDS OF THE U.S. BETWEEN 1970 AND 1980

The data on residence outside the Virgin Islands of the United States were derived from answers to questions 16a, 16b, 16c, 16d, and 16e. These questions were asked of persons 5 years old and over. However, some data on activity were tabulated only for persons 16 years old and over. Those who reported having lived outside the Virgin Islands for 6 or more consecutive months during the last 10 years were asked to report the year they came or returned to the Virgin Islands the last time, where they lived before coming or returning to the Virgin Islands the last time, how long they lived in that place the last time, and for the last 6 months that they lived outside the Virgin Islands, whether or not they were working at a job or business, in the U.S. Armed Forces, or attending school or college. These data were collected for the first time in 1980.

ACTIVITY IN 1975

The data on activity in 1975 come from answers to question 18 which asked persons 15 years old and over whether they were "in the Armed Forces of the United States," "attending college," or "working full or part-time at a job or business" in 1975. Nonresponse was allocated based on answers to other questions and related characteristics. The data are only shown for persons 21 years and over (i.e., persons who were 16 years and over in 1975).

VETERAN STATUS

The data on veteran status were derived from responses to question 19. A "veteran," as defined in census publications, is a person 16 years old or over who has served but is not now serving on active duty in the Armed Forces of the United States. Persons are classified as veterans if they were ever on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or Coast Guard, even if the time served was short. Persons in the National Guard or in military reserve units are classified as veterans only if they were ever called to active duty. All

other civilians 16 years old and over are classified as nonveterans.

Period or Service—Persons who indicated in question 19a that they were veterans were asked to indicate the period or periods in which they served (question 19b). Persons serving in more than one period were classified in the most recent wartime period of service. For example, in Table 37 persons who served both during the Korean conflict and the post-Korean peacetime era between February 1955 and July 1964 were classified in the "Korean conflict" category. If the same person had also served during the Vietnam era, he or she would instead be included in the "Vietnam era and Korean conflict" category. The data were edited to eliminate reported period(s) of service which were inconsistent with the age of the person.

Comparability With Earlier Census Data—Veteran status was asked of both men and women in the 1980 census, the first time such data were collected for women. The wording of the question was changed from the 1970 version in order to make more clear the appropriate response for persons who served in National Guard or reserve units only.

Two categories of period of service were added since 1970: the post-Korean peacetime era between February 1955 and July 1964, and the post-Vietnam peacetime era beginning in May 1975. As in 1970, persons reporting more than one period of service are shown in the most recent wartime period of service category.

WORK DISABILITY

The data on disability status were derived from answers to question 20. Persons were identified as having a work disability if they had a health condition which had lasted 6 months or more and which limited the kind or amount of work they could do at a job. Persons with a work disability were further classified as "Prevented from working" or "Not prevented from working."

The term "health condition" refers to both physical and mental conditions. Temporary health problems are not considered a health condition.

Persons are considered limited in the kind or amount of work they could do if they were restricted in the kinds of jobs at which they were able to work or if they were unable to work at a full-time job.

PUBLIC TRANSPORTATION DISABILITY

Persons are identified as having a public transportation disability if they had a health condition which had lasted 6 months or more and which made it difficult or impossible for them to use buses, or other forms of public transportation.

FERTILITY (CHILDREN EVER BORN)

The data on children ever born were derived from answers to question 21, which was asked of women 15 years old and over, regardless of marital status. Excluded were still-births, stepchildren, and adopted children. Ever-married women were instructed to include all children born to them before and during their most recent marriage, children no longer living, and children away from home, as well as children who were still living in the home. Never-married women were instructed to include all children born to them. Data on children ever born reported by never-married women should be viewed with caution because of the very high rates of nonresponse to the question and the anticipated underreporting of live births to these women.

In the 1980 census, a terminal category of "12 or more" was used for recording the number of children ever born. For purposes of computing the total number of children ever born, the terminal category was given a mean value of 13.

Comparability With Earlier Census Data—The wording of the question on children ever born was the same in 1980 as in 1970. In virtually all of the tables in 1970 census volumes, data presented on children ever born to all women assumed that single women were childless even though it was known that some of the women have had children. Therefore, rates and numbers of children ever born to all women are not comparable between the 1980 reports and previous census reports, since the 1980 census reports include data on children ever born to single women. Data presented for children ever born to women ever married are comparable between the 1980 census and previous censuses containing this question.

REFERENCE WEEK

The data on labor force status relate to the calendar week preceding the date on which respondents were interviewed by enumerators. This week is not the same for all respondents since the enumeration was not completed in one week. However, for the majority of persons the reference week for the 1980 census was the last week in March 1980. Passover and Good Friday occurred in the following week (the first week of April 1980). Many workers presumably took time off for these observances. These holidays could have affected the data on hours worked for some areas if the first week in April was the reference week for a significant number of persons. The holidays probably did not affect the overall measurement of labor force status since labor force data are based on work activity during the entire reference week.

LABOR FORCE STATUS

The data on labor force status were derived from answers to questions 22, 23, and 24.

The series of questions on labor force status was asked of all persons 15 years old and over and was designed to identify, in this sequence: (a) persons who worked at any time during the reference week; (b) persons who did not work during the reference week but who had jobs or businesses from which they were temporarily absent (excluding layoff); (c) persons on layoff; and (d) persons who did not work during the reference week, but who were looking for work during the last four weeks and were available for work during the reference week.

Most of the labor force status data shown in this and other 1980 census reports relate to persons 16 years old and over. Some tables showing labor force status, however, include 15 year

olds; these persons are classified as "not in labor force" by definition. In 1940, 1950, and 1960, labor force status data were presented for persons 14 years old and over. The change in the universe was made in 1970 to agree with the official measurement of the labor force as revised in January 1967. Selected labor force status data were shown in 1970 for persons 14 and 15 years old, but are not presented in 1980.

Employed—Employed persons include all civilians 16 years old and over who were either (a) "at work"—those who did any work at all during the reference week as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business, or (b) were "with a job but not at work" — those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Unemployed—Persons are classified as unemployed if they were civilians 16 years old and over and (a) were neither "at work" nor "with a job but not at work" during the reference week, (b) were looking for work during the last 4 weeks, and (c) were available to accept a job. Examples of jobseeking activities are: (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) investigating possibilities for starting a professional practice or opening a business, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a union or professional register.

Also included as unemployed are persons who did not work at all during the reference week and were waiting to be called back to a job from which they had been laid off.

Civilian Labor Force—The civilian labor force consists of persons classified as employed or unemployed in accordance with the criteria described above.

Experienced Unemployed—Unemployed persons who have worked at any time in the past are classified as the "experienced unemployed."

Experienced Civilian Labor Force—The "experienced civilian labor force" comprises the employed and the experienced unemployed.

Labor Force—The labor force includes all persons classified in the civilian labor force plus members of the U.S. Armed Forces (persons on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard).

Not in Labor Force—All persons 16 years old and over who are not classified as members of the labor force are defined as "Not in labor force." This category consists mainly of students, housewives, retired workers, seasonal workers enumerated in an "off" season who were not looking for work, inmates of institutions, disabled persons, and persons doing only incidental unpaid family work (less than 15 hours during the reference week).

Worker—The term "Worker" appears in connection with several subjects in this report: class of worker, weeks worked in 1979, and the number of workers in family in 1979. Its meaning varies and, therefore, should be determined in each case by referring to the definition of the subject in which it appears.

Nonworkers Per 100 Workers—This measure called the "nonworker/worker ratio" in the 1970 census, is the ratio of the sum of persons "not in the labor force" plus persons under 16 years of age to persons 16 years old and over in the labor force.

Comparability With Earlier Census Data—The questionnaire items and labor force status concepts for the 1980 census were essentially identical to those used in the 1970 census. However, these concepts differed in many respects from those associated with the 1950 and 1960 census; see the Volume 1 publication from the 1970 census for more information.

Comparability With Data From Other Sources—Because employment data from the census are obtained from respondents in households, they differ from statistics based on reports from individual business establishments, farm enterprises, and certain government programs. Persons employed at more than one job are counted only once in the census and are classified according to the job at which they worked the greatest number of hours during the reference week. In statistics based on reports from business and farm establishments, persons who work for more than one establishment may be counted more than once. Moreover, other series unlike those presented here, may exclude private household workers, and self-employed persons, but may include workers less than 16 years of age.

An additional difference in the data arises from the fact that persons who had a job but were not at work are included with the employed in the statistics shown here whereas many of these persons are likely to be excluded from employment figures based on establishment payroll reports. Furthermore, the labor force status data in this report include persons on the basis of place of residence regardless of where they work, whereas establishment data report persons at their place of work regardless of where they live. This latter consideration is particularly significant when comparing data for workers who commute between areas.

For a number of reasons, the unemployment figures of the Bureau of the Census are not comparable with published figures on unemployment compensation claims. For example, figures on unemployment compensation claims exclude persons who have exhausted their benefit rights, as well as new workers who have not earned rights to unemployment insurance, and persons losing jobs not covered by unemployment insurance systems (including some workers in agriculture, domestic services, and religious organizations, and self-employed and unpaid family workers). In addition, the qualifications for drawing unemployment compensation differ from the definition of unemployment used by the Bureau of the Census. Persons working only a few hours during the week and persons temporarily absent from work for reasons other than layoff are sometimes eligible for unemployment compensation but are classified as "employed" in the census reports. Differences in the geographical distribution of unemployment

data arise because the place where claims are filed may not necessarily be the same as the place of residence of the unemployed worker.

Actual Hours Worked—All persons who reported working during the reference week were asked to report in item 22b the number of hours that they worked. The statistics on hours worked pertain to the number of hours actually worked at all jobs, and do not necessarily reflect the number of hours usually worked or the scheduled number of hours. The number of persons who worked only a small number of hours is probably understated since such persons sometimes consider themselves as not working.

LABOR FORCE STATUS IN 1979

The data on labor force status in 1979 were derived from answers to question 29. Persons 16 years old and over are classified as "in labor force in 1979" if (a) in 1979 they worked 1 or more weeks for pay or profit (including weeks on paid vacation or on paid sick leave) or worked without pay on a family farm or in a family business, or were on active duty in the U.S. Armed Forces; or (b) had any weeks of unemployment in 1979. The categories "Worked in 1979" and "With unemployment in 1979" are *not* mutually exclusive.

Worked in 1979 (Work Status in 1979)—Persons 16 years old and over who worked one or more weeks according to the criteria described below are classified as "Worked in 1979;" all other persons 16 years old and over are classified as "Did not work in 1979." Some tables showing work status in 1979 include 15 year olds; these persons are classified as "Did not work in 1979" by definition.

Weeks Worked in 1979—The data on weeks worked in 1979 were derived from answers to questions 29a and 29b. Question 29b (Weeks worked in 1979) was asked of persons 16 years and over who indicated in Question 29a that they worked in 1979.

The data pertain to the number of weeks during 1979 in which a person did any work for pay or profit (including paid vacation and sick leave) or worked without pay on a family farm or in a family business. Weeks of active service in the U.S. Armed Forces are also included. It is probable that the number of persons who worked in 1979 and the number of weeks worked are understated since there is some tendency for respondents to forget intermittent or short periods of employment or to exclude weeks worked without pay.

Usual Hours Worked in 1979—The data on usual hours worked per week in 1979 were derived from answers to question 29c. This question was asked of persons 16 years and over who indicated that they worked in 1979.

The data pertain to the number of hours a person *usually* worked during the weeks worked in 1979. The respondent was to report the number of hours worked per week in the majority of the weeks he or she worked in 1979. If the hours worked per week varied considerably during 1979, the respondent was to report an approximate average of the hours worked per week. The statistics on usual hours worked per week in 1979 are not necessarily related to the data on actual hours worked during the census reference week (question 22b).

Persons 16 years old and over who reported that they usually worked 35 or more hours each week during the weeks they worked are classified as "Usually worked full time;" persons who reported that they usually work 1 to 34 hours are classified as "Usually worked part time."

Year-Round Full-Time Workers—Persons 16 years old and over who usually worked 35 hours or more per week for 50 to 52 weeks in 1979 are classified as "Year-round full-time workers."

With Unemployment in 1979—Persons 16 years old and over who had one or more weeks of unemployment in 1979 according to the criteria described below are classified as "With unemployment in 1979."

The data on weeks of unemployment in 1979 pertain to the number of weeks during 1979 in which a person 16 years old and over did not work but spent any time looking for work (that is, trying to get a job or start a business or professional practice) or on layoff from a job. Examples of looking for work are presented in the definition of *unemployed*. Excluded from weeks of unemployment are any weeks in which the person worked, even for one hour; or any weeks for which the person received any wages or salary; or in which the person was on active duty in the U.S. Armed Forces, on paid vacation, or on paid leave. The question on weeks of unemployment did not inquire whether persons who reported looking for work were available to accept a job. The number of weeks of unemployment is the total number of weeks accumulated during the entire calendar year 1979, regardless of whether the periods of unemployment were continuous.

Mean Weeks of Unemployment—The mean is based on the distribution of persons with unemployment by individual weeks of unemployment from 1 to 52 weeks.

Number of Workers in Family in 1979—The term "worker" as used for these data is defined according to the criteria described in the section of Worked in 1979.

Comparability With Earlier Census Data—The data on weeks worked collected in the 1980 census are comparable with data from the 1970 census but may not be entirely comparable with data from the 1960 census. On the two most recent census questionnaires, two separate questions were used to obtain this information. The first identified persons with any work experience during the year and thus, indicated those persons for whom the questions on number of weeks worked was applicable. In 1960, however, the questionnaire contained only a single question on number of weeks worked.

In 1970, persons responded to the weeks worked question by indicating one of six weeks-worked intervals; in 1980 persons were asked to enter the specific number of weeks they worked.

The data on weeks looking for work in previous year (1979) were collected in 1980 for the first time; the data on usual hours worked were collected for the first time ever in the 1980 census.

OCCUPATION, INDUSTRY, AND CLASS OF WORKER

The data on industry, occupation, and class of worker were derived from answers to questions 26, 27, and 28.

This series of questions was used to obtain industry, occupation, and class of worker information for the employed, the experienced unemployed, and experienced workers not currently in the labor force. The last two categories apply to persons who had worked at some time during the previous five years. All three items related to one specific job that the person held. For an employed person, the information referred to the job held during the reference week. Those who were employed at two or more jobs reported the job at which they worked the greatest number of hours during the reference week. For experienced unemployed persons and for those not in the labor force, the information referred to the last job that they held.

Clerical staff in the Bureau's processing offices converted the written industry and occupation descriptions from the questionnaire to identifying codes by relating these descriptions to an entry in the 1980 Census of Population: *Alphabetical Index of Industries and Occupations* (PHC80-R3), 1982, U.S. Government Printing Office, Washington, D.C. For the industrial code, however, these coders first referred to a Company Name List. This list, prepared from the Standard Statistical Establishment List developed by the Bureau of the Census for use in the economic censuses and surveys, contains the names of establishments and their Standard Industrial Classification code converted to population census equivalents. This listing facilitates coding and helps maintain industrial classification comparability.

Occupation Classification System

The system developed for the 1980 census consists of 503 specific occupation categories arranged into 6 summary and 13 major occupation groups. This classification was developed to be consistent with the 1980 *Standard Occupational Classification Manual* (SOC), published by the U.S. Department of Commerce, Office of Federal Statistical Policy and Standards. This is the first time there was a United States standard to use in developing the census occupational classification.

The SOC Manual presents a list of 12 principles used in occupational classification. The primary principles used were as follows: (1) the classification should realistically reflect the current occupational structure of the United States, and (2) an occupation should be classified on the basis of work performed. The conversion of the census classification to the SOC has caused the 1980 census classification to be less comparable with the classifications used in earlier censuses. See the section on "Comparability."

This report presents selected groupings of the 503 categories. The most detailed tabulation contains 47 occupation data lines, which are shown below with their component categories and the SOC code definition of each category in parentheses. The lines marked with an asterisk (*) are the remainder of major occupation groups, not shown in the report. The 1980 Census of Population: *Classified Index of Industries and Occupations* (PHC80-R4), 1982, U.S. Government Printing Office, Washington, D.C., provides information on the composition of the detailed categories.

Executive, Administrative, and Managerial Occupations (11-14)

Officials and administrators, public administration (11)—Includes legislators, chief executives, general administrators, and administrators, protective services.

Management related occupations(14)—Includes accountants; auditors; financial officers; management analysts; personnel, training, and labor relations specialists; buyers and purchasing agents; business and promotion agents; and inspectors and compliance officers, including construction.

**Officials and administrators, other* (12, 13)—Includes financial, personnel and labor relations, purchasing, marketing, advertising, and public relations managers; education and health administrators; property and real estate managers; postmasters and mail superintendents; and funeral directors.

Professional Specialty Occupations (16-34, 398)

Engineers and natural scientists(16-18)—Includes architects, engineers, surveyors, mathematicians, and natural scientists.

Engineers (162, 163)—Includes aerospace, metallurgical, mining, petroleum, chemical, nuclear, civil, agricultural, electrical and electronic, industrial, mechanical, and marine engineers, and naval architects.

**Architects, surveyors, mathematicians, and natural scientists* (161, 164, 17, 18)—Includes architects, surveyors, and mapping scientists; computer systems analysts; operations and systems researchers and analysts; actuaries, mathematicians, and statisticians; physicists, geologists, and chemists except biochemists; and atmospheric, space, agricultural, biological, forestry, conservation, and medical scientists.

Health diagnosing occupations (26-28)—Includes physicians, dentists, veterinarians, optometrists, and podiatrists.

Health assessment and treating occupations(29, 30)—Includes registered nurses, pharmacists, dietitians, therapists, and physicians' assistants.

Teachers, librarians, and counselors (22-25)

Teachers, elementary and secondary schools(231-233)—Includes prekindergarten, kindergarten, elementary, and secondary school teachers, but excludes principals and supervisors.

**Other teachers, librarians, and counselors* (22, 235, 236, 239, 24, 25)—Includes teachers, except elementary and secondary schools, vocational and educational counselors, librarians, archivists, and curators.

**Other professional specialty occupations* (19-21, 32-34, 398)—Includes economists, psychologists, sociologists, urban planners, social workers, recreation workers, the clergy and other religious workers, lawyers, judges, editors and reporters, announcers, public relations specialists, photographers, writers, artists, and entertainers.

Technicians and Related Support Occupations(36-39, except 398; 825)

Health technologists and technicians (36)—Includes clinical laboratory, health record, and radiologic technicians; dental hygienists; and licensed practical nurses.

Technologists and technicians, except health (37-39, except 398; 825)—Includes engineering, science, and surveying technicians; drafting occupations; airplane pilots; air traffic controllers; broadcast equipment operators; computer programmers; tool programmers, numerical control; and legal assistants.

Sales Occupations (40-44)

Supervisors and proprietors, sales occupations (40)

Sales representatives, commodities and finance (41, 42)—Includes insurance, real estate, securities, advertising, and other business service sales occupations; sales engineers; and mining, manufacturing, and wholesale trade sales representatives.

Other sales occupations (43, 44)—Includes retail sales workers; sales counter clerks; cashiers; street and door-to-door sales workers; news vendors; demonstrators, promoters, and models; auctioneers; and sales support occupations.

Cashiers (4364)

Administrative Support Occupations, Including Clerical (45-47)

Computer equipment operators (461)

Secretaries, stenographers, and typists (462)

Financial records processing occupations (471)—Includes bookkeepers; accounting, payroll, billing, and cost clerks; and billing and calculating machine operators.

Mail and message distributing occupations (474)—Includes postal clerks, mail carriers, mail clerks, and messengers.

**Other administrative support occupations* (45, 46 except 461, 462; 47 except 471, 474)—Includes clerical supervisors; interviewers; receptionists; transportation and reservation agents; hotel, classified-ad, correspondence, personnel, library, file, order, and record clerks; duplicating, mail, and office machine operators; telephone operators, telegraphers, and other communications equipment operators; dispatchers; production coordinators; traffic, shipping, stock and inventory clerks; meter readers; weighers, measurers, checkers, and samplers; expediters; adjusters and investigators; bill and account collectors; eligibility, office, and statistical clerks; bank tellers; proofreaders; data-entry keyers; and teachers' aides.

Private Household Occupations (50)—Includes launderers, cooks, housekeepers, child care workers, and household cleaners and servants.

Protective Service Occupations (51)

Police and firefighters (5123, 5132)—Includes police, detectives, and firefighters.

**Other protective service occupations* (511, 5122, 5133, 5134, 514)—Includes protective service supervisors, fire inspection and prevention occupations, sheriffs and other law enforcement officers, correctional institution officers, and guards.

Service Occupations, Except Protective and Household (52)

Food service occupations (521)—Includes bartenders; cooks; waiters; kitchen, food counter, and fountain workers; and waiters' assistants.

Cleaning and building service occupations (524)—Includes maids and housemen, janitors, elevator operators, and pest control occupations.

**Health and personal service occupations* (523, 525, 526)—Includes dental assistants, nursing and other health aides, orderlies and attendants, barbers, hairdressers and cosmetologists, recreation and public transportation attendants, guides, ushers, baggage porters, bellhops, welfare service aides, and child care workers.

Farming, Forestry, and Fishing Occupations (55-58, part 8241)

Farm operators and managers (55)

Farm workers and related occupations (56)—Includes farm, marine life, cultivation, and nursery workers; groundskeepers and gardeners; animal caretakers; and graders, sorters, and inspectors, agricultural products.

**Forestry and fishing occupations* (57, 58, part 8241)—Includes forestry and logging workers, fishers, captains of fishing vessels, hunters, and trappers.

Precision Production, Craft, and Repair Occupations (60-71 except part of 68, part 7477, 7668, part 7677, 7752, 828)

Mechanics and repairers (60, 61)—Includes vehicle and mobile equipment, industrial machinery, machinery maintenance, heating, and air conditioning mechanics; electrical and electronic equipment repairers, including telephone and telephone line installers; and camera, watch, musical instruments, office machine, mechanical controls, and valve repairers; locksmiths; elevator installers; and millwrights.

Construction trades (63, except 632, 64)—Includes brickmasons, stonemasons, tile setters, carpet installers, drywall installers, electricians, electrical power installers and repairers, painters, paperhangers, plasterers, plumbers, concrete finishers, glaziers, insulation workers, paving equipment operators, roofers, sheet-metal duck installers, structural metal workers, earth drillers, and construction apprentices.

Precision production occupations (67-71 except part of 68, part 7477, 7668, part 7677, 7752, 828)—Includes precision metalworking and woodworking occupations, precision textile and apparel machine workers, precision workers, assorted materials, precision food production occupations, precision inspectors and testers, plant and system operators, and production supervisors.

**Extractive occupations* (632, 65)—Includes oil well drillers, explosives workers, miners and mining machine operators.

Machine Operators, Assemblers, and Inspectors (Part of 68, 73-78)

Machine operators and tenders, except precision (Major parts of 73-76, plus minor part of 68)—Includes metal and plastic working, fabricating, metal and plastic processing, printing, textile and apparel machine operators; machine operators of assorted materials with such functions as blending, cementing, packaging, filtering, paint spraying, washing, etc.; motion picture projectionists; and photographic process machine operators.

Fabricators, assemblers, inspectors, and samplers (77 except 7752, 78, plus minor parts of 73 and 75)—Includes welders, solderers, assemblers; hand-cutting, molding, painting, engraving, and miscellaneous hand working occupations; and production inspectors, testers, samplers, and weighers.

Transportation and Material Moving Occupations (811, 821, 823, 824, except part of 8241, 83, 874)

Transportation occupations (811, 821, 823, 824, except part of 8241, 874)

Motor vehicle operators (8111, 821, 874)—Includes truck, bus, and taxicab drivers; chauffeurs; driver-sales workers; and parking lot attendants.

**Rail and water transportation occupations*—(8113, 823, 824 except part 8241)—Includes railroad conductors, yardmasters, brake, signal, and switch operators; rail vehicle operators; locomotive operation occupations; ship captains, except fishing vessels; sailors and deckhands; bridge, lock, and lighthouse tenders.

Material moving equipment operators (812, 83)—Includes operating engineers; longshore equipment, hoist, and crane and tower operators; excavating machine operators including dozers; and industrial truck and tractor equipment operators.

Handlers, Equipment Cleaners, Helpers, and Laborers (85-87, except 874)

Construction laborers (871)

Freight, stock, and material handlers (872)—Includes garbage collectors, stevedores, stock handlers and baggers, machine feeders, and other material handlers.

**Other handlers, equipment cleaners, helpers and laborers* (85, 86, 873, 875)—Includes mechanic, construction, extractive, and production helpers; garage and service station related workers; vehicle washers; hand packers; and laborers, except construction.

The highest level of aggregation provided by the SOC is six summary groupings. These six groupings are shown below with their component two digit SOC codes shown in parentheses.

Managerial and professional specialty occupations (11 – 34)

Technical, sales, and administrative support occupations (36 – 47)

Service occupations (50 – 52)

Farming, forestry, and fishing occupations (55 – 58)

Precision production, craft, and repair occupations (60 – 71)

Operators, fabricators, and laborers (73 – 87)

Industry Classification System

The industry classification system developed for the 1980 Census of Population consists of 231 categories classified into 13 major industry groups. Since 1940 the industrial classification has been based on the *Standard Industrial Classification Manual* (SIC). The 1980 census classification was developed from the 1972 SIC published by the Executive Office of the President, Office of Management and Budget, and the 1977 supplement to that manual.

This report presents selected groups of the 231 categories. The most detailed tabulation includes 47 industry data lines, which are shown below with their component categories and the equivalent SIC codes in parentheses after each of the group titles. The lines marked with an asterisk (*) are the remainder of major industry groups, not shown in the report. For readers without access to the SIC, the list below also presents descriptive terms of the content of the categories as required. Major industry group titles are in bold face. The 1980 Census of Population: *Classified Index of Industries and Occupations* (PHC80-R4), 1982, U.S. Government Printing Office, Washington, D.C., provides additional information on the industry classification system.

Agriculture, Forestry, and Fisheries (01, 02, 07-09)

Agriculture (01, 02, 07)

Forestry and fisheries (08, 09)

Mining (10-14)

Construction (15-17)

Manufacturing (20-39)

Food and kindred products (20)—Includes meat, dairy, and grain products; bakery and sugar products; beverage industries; and canning and preserving.

Textile mill and finished textile products (22, 23)—Includes textiles, carpets, and apparel.

Printing, publishing, and allied industries (27)

Chemicals and allied products (28)—Includes synthetic fibers, drugs, soaps, and paints.

**Other nondurable goods* (21, 26, 29-31)—Includes tobacco, paper, petroleum refining and coal, rubber, plastics, and leather products.

Furniture, lumber, and wood products (24, 25)—Includes logging, sawmills, mobile home and furniture manufacturing.

Metal industries (33, 34)—Includes primary iron, steel, and aluminum furnaces, and rolling and finishing mills; cutlery, handtools, screw machine products, metal forging and stampings, ordnance and other fabricated metal industries.

Machinery, except electrical (35)—Includes engines, farm machinery, and office and electronic computing equipment.

Electrical machinery, equipment, and supplies (36)

Transportation equipment (37)

*Professional and photographic equipment and watches (38)—Includes scientific instruments, optical and health supplies, photographic equipment, watches, and clocks.

**Other durable goods, including not specified manufacturing* (32, 39)—Includes stone, clay, glass, and concrete products; and toys and sporting goods.

Transportation, Communications, and Other Public Utilities (40-49)

Trucking service and warehousing (42)

Air transportation (45)

Other transportation (40, 41. 43, 44, 46, 47)—Includes railroads, urban transit, bus and water transportation, pipelines and transportation services, and the U.S. postal service.

Communications (48)—Includes radio, television, telephone, and telegraph communication services.

Utilities and sanitary services (49)—Includes electric, gas, water, and sanitary services.

Wholesale Trade (50, 51)

Retail Trade (52-59)

General merchandise stores (53)—Includes department stores and variety stores.

Food, bakery, and dairy stores (54)

Automotive dealers and gasoline stations (55)

Eating and drinking places (58)

**Other retail trade* (52, 56, 57, 59)

Finance, Insurance, and Real Estate (60-67)

Banking and credit agencies (60, 61)

Insurance, real estate, and other finance (62-67)

Business and Repair Services (73, 75, 76)

Business services (73)—Includes advertising, research labs, employment agencies, consulting services, computer programming services, and detective services.

Repair services (75, 76)—In addition to repair shops, includes automobile rental, parking, and washing services.

Personal Services (70, 72, 88)

Private households (88)

Hotels and lodging places (70)

Other personal services (72)—Includes garment services, and beauty, barber, dressmaking, and shoe repair shops.

Entertainment and Recreation Services (78, 79)—Includes theaters, motion pictures, bowling alleys, and billiard parlors.

Professional and Related Services (80-86, 89)

Hospitals (806)

Health services, except hospitals (80, except 806)

Elementary and secondary schools and colleges (821, 822)

Other educational services (823, 824, 829)—Includes all other schools (correspondence, etc.) and libraries.

Social services, religious and membership organizations (83, 86)

Legal, engineering, and other professional services (81, 84, 89)

Public Administration (91-97)

Relation of Some Industry Groups to Similar Occupations or Class of Worker—The industry category "Public administration" is limited to regular government functions such as legislative, judiciary, administrative, and regulatory activities of governments. Other government organizations such as schools, hospitals, liquor stores, and bus lines are classified by industry according to the activity in which they are engaged. On the other hand, the class of worker government categories include all government workers.

Some occupation groups are closely related to certain industries. Operators of transportation equipment, farm operators and workers, and private household workers account for major portions of their respective industries of transportation, agriculture, and private households. The industry categories, however, include persons in other occupations. For example, persons employed in agriculture include truck drivers and bookkeepers; persons employed in the transportation industry include mechanics, freight handlers, and bookkeepers; and persons employed in the private household industry include occupations such as chauffeur, gardener, and secretary.

Class of Worker

The class of worker item on the questionnaire consists of six categories which are defined as follows:

1. *Private wage and salary workers*—Persons who worked for a private employer for wages, salary, commission, tips, pay-in-kind, or at piece rates. Private employers include churches and other non-profit organizations.

2. *Government workers*—Persons who worked for any governmental unit, regardless of the activity of the particular agency. This category is subdivided by the level of government: (a) Federal (including international) and (b) local (territorial and its subdivisions).

3. *Self-employed workers*—
   a. Own business not incorporated—Persons who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm. Included here are the owner-operators of large stores and manufacturing

establishments as well as small merchants, independent craftpersons and professionals, farmers, peddlers, and other persons who conducted enterprises of their own.

b. Own business incorporated—Persons who consider themselves self-employed but work for corporations. In most cases the respondents will own or be part of a group that owns controlling interest in the corporation. Since all workers of a corporation are defined as wage and salary workers, this category is tabulated with "private wage and salary workers," and shown as a subcategory of that group.

4. *Unpaid family workers*—Persons who worked without pay on a farm or in a business operated by a person to whom they are related by blood or marriage. These are usually the children or the wife of the owner of a business or farm.

Edit and Allocation Procedures—Occasionally respondents supplied industry, occupation, or class of worker descriptions which were not sufficiently specific for precise classification or did not report on these items. Some of these cases were corrected through the field editing process and during the coding operation certain types of incomplete entries were corrected using the *Alphabetical Index of Industries and Occupations*. For example, it is possible in certain situations to assign an industry code based on the occupation reported.

Following the coding operation, there was a computer edit and allocation process. The edit first determined whether a respondent was in the universe which required an industry and occupation code. The codes for the three items (industry, occupation, and class of worker) were checked to make sure they were valid and were edited for their relation to each other. Invalid and inconsistent codes were either blanked or changed to a consistent code.

If one or more of the three codes were blank after the edit, a code was allocated from a "similar" person based on other items such as age, sex, education, and weeks worked. This was the first census that allocated industry and occupation to detailed categories.

Comparability With Earlier Censuses—Comparability of industry and occupation data is affected by a number of factors, a major one being the systems used to classify the questionnaire responses. For both the industry and occupation classification systems, the basic structures were generally the same from 1940 to 1970, but changes in the individual categories limited comparability of the data from one census to another. These changes resulted from the need to recognize the "birth" of new industries and occupations, the "death" of others, and growth and decline in existing industries and occupations, as well as the desire of analysts and other users for increased detail in presentation of the data. Probably the greatest cause of incomparability is the movement of a segment of a category to a different category in the next census. Such movements are necessitated by changes in functions and respondent terminology, and refinement of category composition.

In the 1980 census, the industry classification underwent limited change to reflect recent changes to the SIC. The occupation classification however was substantially revised because of the adoption of the Standard Occupational Classification by Federal agencies (see "Occupation Classification System"). During this entire period, from 1940 to 1980, the number of categories in the industry classification system increased from 132 to 231, and in the occupation system from 224 to 503.

Other factors that affect data comparability include the universe to which the data refer (in 1970, the age cutoff for labor force was changed from 14 years to 16 years); how the industry and occupation questions are worded on the questionnaire (for example, important changes were made in 1970); improvements in the coding procedures (the Company Name List technique was introduced in 1960 for the U.S. and in 1980 for the Virgin Islands of the United States); and how the "not reported" cases are handled. Prior to 1970, they were placed in residual "Industry not reported" and "Occupation not reported" categories. In 1970, an allocation process was introduced through which these cases were assigned to major groups. In 1980, the "not reported" cases were assigned to individual categories. Therefore, the 1980 data for individual categories include some numbers of persons who would have been tabulated in a "not reported" category in previous censuses.

The following publications contain information on the various factors affecting comparability and are particularly useful for understanding differences in the occupation and industry information from earlier censuses: U.S. Bureau of the Census, Sixteenth Census Reports, Population, *Comparative Occupation Statistics for the United States, 1870 to 1940*; U.S. Bureau of the Census, *Occupational Trends in the United States, 1900 to 1950*, Working Paper No. 5, 1958; U.S. Bureau of the Census, *Changes Between the 1950 and 1960 Occupation and Industry Classifications-With Detailed Adjustments of 1950 Data to the 1960 Classifications*, Technical Paper No. 18, 1968; and U.S. Bureau of the Census, *1970 Occupation and Industry Classification Systems in Terms of their 1960 Occupation and Industry Elements*, Technical Paper No. 26, 1972.

Comparability With Other Data—Comparability between the statistics presented in this volume and statistics from other sources is affected by many of the factors described in the section on "Labor Force Status." These factors are primarily geographic differences between residence and place of work, different dates of reference, and differences in counts because of dual job holding. Industry data from population censuses cover all industries and all kinds of workers, whereas data from establishments often exclude private household workers, government workers, and the self-employed. Also, the replies from household respondents may differ in detail and nature from those obtained from establishments.

Occupation data from the census and data from government licensing agencies, professional associations, trade unions, etc., may not be as comparable as expected. Organizational listings often include persons not in the labor force or persons devoting all or most of their time to another occupation; or the same person may be included in two or more different listings. In addition, relatively few organizations, except for those requiring licensing, attain complete coverage of membership in a particular occupation field.

INCOME IN 1979

The data on income in 1979 were derived from answers to questions 30 and 31. Information on money income received in the calendar year 1979 was requested from persons 15 years old and over. "Total income" is the algebraic sum of the amounts reported separately for wage or salary income; nonfarm net self-employment income; farm net self-employment income; interest, dividend, net royalty or rental income; Social Security or Railroad Retirement income; public assistance or welfare income; and all other income. "Earnings" is defined as the algebraic sum of wage or salary income and net income from farm and nonfarm self-employment. The earnings figures represent the amount of income received regularly before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources were not included as income: money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of income "in kind" from food stamps, public housing subsidies, medical care, employer contributions for pensions, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Type of Income

The seven types of income reported in the census are defined as follows:

Wage or Salary Income—Total money earnings received for work performed as an employee during the calendar year 1979. It includes wages, salary, U.S. Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions were made for taxes, bonds, pensions, union dues, etc.

Nonfarm Self-Employment Income—Net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc.

Farm Self-Employment Income—Net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, government farm programs, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farm-hands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not local or Federal personal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income.

Interest, Dividend, or Net Rental Income—Includes interest on savings or bonds, dividends from stockholdings or membership in associations, net royalties, and net income from rental of property to others and receipts from boarders or lodgers.

Social Security Income—Includes Social Security pensions and survivors benefits and permanent disability insurance payments made by the Social Security Administration, prior to deductions for medical insurance, and railroad retirement insurance checks from the U.S. Government. "Medicare" reimbursements are not included.

Public Assistance Income—Includes (1) supplementary security income payments made by Federal or territorial welfare agencies to low income persons who are aged (65 years old or over), blind, or disabled; (2) aid to families with dependent children, and (3) general assistance. Separate payments received for hospital or other medical care (vendor payments) are excluded from this item.

All Other Income—Includes unemployment compensation, veterans' payments, public or private pensions, alimony or child support, worker's compensation, periodic payments from estates and trust funds, periodic receipts from annuities or insurance, contributions received periodically from persons not living in the household, military family allotments, net gambling winnings, and other kinds of periodic income other than earnings.

Income of Households—Household income includes the income of the householder and all other persons 15 years old and over in the household, whether related to the householder or not. Since many households consist of only one person, average household income is usually less than average family income.

Income of Families and Unrelated Individuals—In the compilation of statistics on family income, the incomes of all members 15 years old and over in each family are summed and treated as a single amount. However, for unrelated individuals 15 years old and over, the total amount of their own income is used. Although the income statistics cover the calendar year 1979, the characteristics of persons and the composition of families refer to the time of enumeration (April 1980). Thus, the income of the family does not include amounts received by persons who were members of the family during all or part of the calendar year 1979 if these persons no longer resided with the family at the time of enumeration. On the other hand, family income amounts reported by related persons who did not reside with the family during 1979 but who were members of the family at the time of enumeration are included. However, the composition of most families was the same during 1979 as in April 1980.

Median Income—The median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For households, families, and unrelated individuals the median income is based on the distribution of the total number of units including those with no income. The median for persons is based on persons with income. The median income values for all households, families, and unrelated individuals are computed on the basis of more detailed income intervals than shown in this report. Median income figures of $20,000 or less are generally calculated using linear interpolation; all

other median income amounts are derived through Pareto interpolation. For a detailed description of these interpolation procedures, see appendix B of the Current Population Reports, Series P-60, No. 129, *Money Income of Families and Persons in the United States: 1979.*

Mean Income—The mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For the various types of income the means are based on households having those types of income.

Per Capita Income—Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Care should be exercised in using and interpreting mean income values for small subgroups of the population. Since the mean is strongly influenced by extreme values in the distribution, it is especially susceptible to the effects of sampling variability, misreporting, and processing errors. The median, which is not affected by extreme values, is, therefore, a better measure than the mean when the population base is small. The mean, nevertheless, is shown in this report for most small subgroups because, when weighted according to the number of cases, the means can be added to obtain summary measures for areas and groups other than those shown in this report.

Limitations of the Data—Since questionnaire entries for income are frequently based on memory and not on records, many persons tend to forget minor or irregular sources of income, and therefore, underreport their income. Underreporting tends to be more pronounced for income sources that are not derived from earnings, such as Social Security, public assistance, or net income from interest, dividends, and rentals. In addition, there are errors of reporting due to misunderstanding of the income questions. One such error is the reporting of gross rather than net dollar amounts for the two questions on net self-employment income, which results in an overstatement of these items. Another common error is the reporting of identical dollar amounts in two of the seven type of income items where a respondent with only one source of income assumed that the second amount should be entered to represent total income. Such instances of overreporting would have an impact on the level of mean nonfarm or farm self-employment income and mean total income published for the various geographical subdivisions of the Area.

Extensive review procedures were instituted in the coding operation to reduce some of these reporting errors and to improve the accuracy of the income data. Moreover, many reporting errors were rectified through the coding and the computer editing procedures, with the result that consistency of reported income items with work experience, occupation, and class of worker information was improved. For example, if a person reported he was self-employed on his own farm, not incorporated, but had reported wage and salary earnings only, the latter amount was shifted to net farm self-employment income. Also, if a person reported total income only, the amount was generally assigned to one of the type of income items according to responses to the work experience and class-of-worker questions. Another type of problem involved non-reporting of income data. Where income information was not reported, computer allocation procedures were devised to impute appropriate values (either no income or positive or negative dollar amounts) for the missing entries. These procedures are described in Appendix D, "Accuracy of the Data."

In income tables for households, families, and unrelated individuals, the lowest income group (e.g., less than $1,000) includes units that were classified as having no 1979 income. Many of these were living on income "in kind," savings, or gifts, were newly created families or were families in which the sole breadwinner had recently died or left the household. However, many of the families and unrelated individuals who reported no income probably had some money income which was not recorded in the census.

The income data in this report cover money income only. The fact that many families receive an important part of their income in the form of "free" housing and goods produced and consumed on the farm rather than in money should be taken into consideration in comparing the income of farm and nonfarm residents. Nonmoney income is also received by some nonfarm residents. Such income often takes the form of business expense accounts, use of business transportation and facilities, or partial compensation by business for medical and educational expenses. Many low income families also receive income "in kind" from public welfare programs. In comparing income data for 1979 with earlier years, it should be noted that an increase or decrease in money income does not necessarily represent a comparable change in real income, unless adjustments for changes in prices are made.

Comparability

Data From Earlier Censuses—The income data collected in the 1960 and 1970 censuses are basically similar to the 1980 census data, but there are variations in the detail of the questions. In 1970, each person was required to report (a) wage or salary income, (b) net nonfarm self-employment (c) net farm self-employment, (d) Social Security or railroad retirement, (e) public assistance or welfare payments, and (f) income from all other sources in 1969. Between the 1970 and 1980 censuses, there were also some changes in the processing of the data. In the 1970 census, all missing values were imputed either as "None" or as a dollar amount. If a person reported a dollar amount in (a) wage or salary income, (b) net nonfarm self-employment income, or (c) net farm self-employment income, the person was considered as unallocated only if no further dollar amounts were imputed for any additional missing entries. In the 1980 census, all persons with missing values in one or more of the seven types of income items and total income were designated as allocated. If total income was reported and one or more of the types of income fields was not answered, then the entry in total income was generally assigned to one of the income types according to the socioeconomic characteristics of the income recipient. This person was designated as unallocated. Moreover, there was a difference

in the method of computer derivation of aggregate income from individual amounts that were coded in tens, hundreds, and thousands of dollars in the coding operation. In the 1970 census processing, $50 and $5,000, respectively, were added by the computer to each amount coded in hundreds of dollars (under $100,000) and tens of thousands ($100,000 or more). Entries of $990,000 or more were treated as $995,000, and losses of $9,900 or more were treated as minus $9,950. In the 1980 census, income amounts less than $100,000 were coded in tens of dollars, and amounts of $100,000 or more were coded in thousands of dollars; $5 was added to each amount coded in tens of dollars and $500 to each amount coded in thousands of dollars. Entries of $999,000 or more were treated as $999,500, and losses of $9,990 or more were treated as $9,995 in all of the computer derivations of income aggregates. The coding schemes used in both the 1970 and 1980 censuses were developed to accommodate space limitations on the questionnaires.

In both the 1970 and 1980 censuses, all nonrespondents on income (whether heads of families or other persons) were assigned the reported income of persons with similar characteristics, as described generally in Appendix D, "Accuracy of the Data."

In 1960, data on income were obtained from all persons 14 years old and over. Each person was requested to report (a) wage or salary income (b) net self-employment income, and (c) income other than earnings received in 1959. An assumption was made in the editing process that no other type of income was received by a person who reported the receipt of either wage and salary income or self-employment but had failed to report the receipt of other money income.

In 1950, information on income was obtained from every person 14 years old and over. If the person was the head of the family, the income questions were repeated for the other family members as a group in order to obtain the income of the whole family. In the tabulations of family income for the 1950 census, if only the head's income was reported, it was assumed that there was no other income in the family.

In 1940, no question on income was asked.

Income Tax Data—For several reasons, the income data shown in this report are not directly comparable with those which may be obtained from statistical summaries of income tax returns. Income, as defined for tax purposes, differs somewhat from the Bureau of the Census concept. Moreover, the coverage of income tax statistics is different because of the exemptions of persons having small amounts of income and the inclusion of net capital gains in tax returns. Furthermore, members of some families file separate returns and others file joint returns; consequently the income reporting unit is not consistently either a family or a person.

Social Security Administration Earnings Record Data—The earnings data shown in this report are not directly comparable with earnings records of the Social Security Administration. The earnings record data for 1979 exclude the earnings of most civilian government employees, some employees of nonprofit organizations, workers covered by the Railroad Retirement Act, and persons not covered by the program because of insufficient earnings. Furthermore, earnings received from any one employer in excess of $22,900 in 1979 are not covered by earnings records. Finally, since census data are obtained from household questionnaires, they may differ from Social Security Administration earnings record data, which are based upon employers' reports and the Federal income tax returns of self-employed persons.

POVERTY STATUS IN 1979

Definitions

The data on poverty status were derived from answers to the same questions as the income data (see section on "Income in 1979"). Poverty statistics for the Virgin Islands of the United States are being published for the first time in this report of the 1980 census.

Poverty statistics presented in this report are based on a definition originated by the Social Security Administration in 1964 and subsequently modified by Federal interagency committees in 1969 and 1980. At the core of this definition is the 1961 economy food plan, the least costly of four nutritionally adequate food plans designed by the Department of Agriculture. It was determined from the Agriculture Department's 1955 survey of food consumption that families of three or more persons spend approximately one-third of their income on food; hence the poverty level for these families was set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses for these smaller households.

The income cutoffs used by the Bureau of the Census to determine the poverty status of families and unrelated individuals are comprised of a set of 48 thresholds arranged in a two-dimensional matrix consisting of family size (from one person to nine or more persons) cross-classified by presence and number of family members under 18 years old (from no children present to eight or more children present). Unrelated individuals and two-person families are further differentiated by age of the householder (under 65 years old and 65 years old and over). The total income of each family or unrelated individual is tested against the appropriate poverty threshold to determine the poverty status of that family or unrelated individual. If the total income is less than the corresponding cutoff, the family or unrelated individual is classified as below the poverty level. The number of persons below the poverty level is the sum of the number of persons in families with incomes below the poverty level and the number of unrelated individuals with incomes below the poverty level.

The poverty thresholds are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index. The average poverty threshold for a family of four persons was $7,412 in 1979. (See table at end of appendix.) For a detailed discussion of the poverty definition, see U.S. Bureau of the Census, Current Population Reports, Series P-60, No. 133, *Characteristics of the Population Below the Poverty Level: 1980.*

Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, State, or local variations in the

cost of living. Therefore, the thresholds used for the Virgin Islands are the same as those used in the United States.

Persons for Whom Poverty Status is Determined—Poverty status is determined for all persons except inmates of institutions, persons in military group quarters and in college dormitories, and unrelated individuals under 15 years old. When the line, "Persons for whom poverty status is determined," appears under the heading, "All Income Levels in 1979," it shows the total population minus persons in the four groups listed above. When the same line appears under the heading, "Income in 1979 Below Poverty Level," it shows the number of such persons who are classified as being below the poverty level. In tables that contain only poverty data, the above exclusions are stated in the headnote and the word "persons" is used in place of "persons for whom poverty status is determined."

Specified Poverty Levels—Because the poverty levels currently in use by the Federal Government do not meet all the needs of data users, some of the data are presented for alternate levels ranging from 75 percent to 200 percent of the current poverty level. These specified poverty levels are obtained by multiplying the income cutoffs at the poverty level by the appropriate factor. For example, the average income cutoff at 125 percent of poverty level was $9,265 ($7,412 x 1.25) in 1979 for a family of four persons.

Weighted Average Thresholds at the Poverty Level—The average thresholds shown in the first column of the table were weighted by the presence and number of children. For example, the weighted average threshold for a given family size is obtained by multiplying the threshold for each presence and number of children category within the given family size by the number of families in that category. These products are then aggregated across the entire range of presence and number of children categories, and the aggregate is divided by the total number of families in the group to yield the weighted average threshold at the poverty level for that family size.

Since the basic thresholds used to determine the poverty status of families and unrelated individuals are applied to all families and unrelated individuals, the weighted average poverty thresholds are derived using all families and unrelated individuals rather than just those classified as being below the poverty level. To obtain the weighted poverty thresholds for families and unrelated individuals below alternate poverty levels, the weighted thresholds shown in the table may be multiplied directly by the appropriate factor. The weighted average thresholds presented in the table are based on the March 1980 Current Population Survey. However, it is felt that these thresholds would not differ significantly from those based on the 1980 census.

Income Deficit—Income deficit is the difference between the total income of families and unrelated individuals below the poverty level and their respective poverty thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars and for such cases the deficit is equal to the poverty threshold. This measure provides an estimate of the amount which would be required to raise the incomes of all poor families and unrelated individuals to their respective poverty thresholds. The income deficit is thus a measure of the degree of impoverishment of a family or unrelated individual. However, caution must be exercised in comparing the average deficits of families with different characteristics. Apparent differences in average income deficits may, to some extent, be a function of differences in family size.

Mean Income Deficit—The mean income deficit is the amount obtained by dividing the total income deficit of a group below the poverty level by the number of families (or unrelated individuals) in that group.

Limitations

The term "poverty" connotes a complex set of economic, social, and psychological conditions. The statistics presented in this report provide only estimates of economic poverty based on the receipt of money income before taxes. Readers should also be aware that for many different reasons there is a tendency for respondents to underreport their income. Overall, income earned from wages or salary is more accurately reported than other sources of income. (For a complete discussion of the limitations of the income data, see income definitions.)

It should be pointed out that nonmoney income is not considered in determining poverty status. In recent years, however, receipts from nonmoney transfers such as food stamps, housing subsidies, and health benefits have become an increasingly important element in the income of poor persons. For further information on the subject of valuing noncash benefits, see U.S. Bureau of the Census, Technical Paper 50, *Alternative Methods for Valuing Selected in-Kind Transfer Benefits and Measuring Their Effect on Poverty*. For a complete discussion of the limitations of the poverty concept, see Current Population Reports, Series P-60, No. 133.

Thresholds at the Poverty Level in 1979 by Size of Family and Number of Related Children Under 18 Years

(Figures in dollars. For meaning of symbols, see Introduction)

Size of Family Unit	Weighted average thresholds	Related children under 18 years								
		None	1	2	3	4	5	6	7	8 or more
1 person (unrelated individual)	3,686	3,686	...	...	...	...	...	...	...	...
Under 65 years	3,774	3,774	...	...	...	...	...	...	...	...
65 years and over	3,479	3,479	...	...	...	...	...	...	...	...
2 persons	4,723	4,723	...	...	...	...	...	...	...	...
Householder under 65 years	4,876	4,858	5,000	...	...	...	...	...	...	...
Householder 65 years and over	4,389	4,385	4,981	...	...	...	...	...	...	...
3 persons	5,787	5,674	5,839	5,844	...	...	...	...	...	...
4 persons	7,412	7,482	7,605	7,356	7,382	...	...	...	...	...
5 persons	8,776	9,023	9,154	8,874	8,657	8,525	...	...	...	...
6 persons	9,915	10,378	10,419	10,205	9,999	9,693	9,512	...	...	...

Appendix C.—General Enumeration and Processing Procedures

USUAL PLACE OF RESIDENCE. C–1
U.S. Armed Forces C–1
Crews of Merchant Vessels . . . C–1
Persons Away at School C–1
Persons in Institutions C–1
Persons Away From Their Residence on Census Day . . . C–1
Residents Abroad C–1
Persons From Other Areas. . . . C–1
DATA COLLECTION PROCEDURES. C–2
PROCESSING PROCEDURES. . . C–2

USUAL PLACE OF RESIDENCE

In accordance with census practice, each person enumerated in the 1980 census was counted as an inhabitant of his or her "usual place of residence," which is generally construed to mean the place where the person lives and sleeps most of the time. This place is not necessarily the same as the person's legal or voting residence. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there might be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishment of residence rules for certain categories of persons whose usual place of residence is not immediately apparent. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be staying on Census Day (April 1). Persons without a usual place of residence, or persons with no one at their usual place of residence to report them to a census taker, however, were counted where they happened to be staying.

U.S. Armed Forces

Members of the U.S. Armed Forces living on a military installation were counted, as in previous censuses, as residents of the area in which the installation was located; members of the U.S. Armed Forces not living on a military installation were counted as residents of the area in which they were living. Family members of U.S. Armed Forces personnel were counted where they were living on Census Day (i.e., with the U.S. Armed Forces personnel or at another location, as the case might be).

Each U.S. Navy ship was attributed to the geographic area that the Department of the Navy designated as its homeport.

Crews of Merchant Vessels

Crews of merchant ships berthed in a port, excluding those not flying a U.S. flag, were enumerated as of that port.

Persons Away at School

College students were counted as residents of the area in which they were living while attending college. However, children in boarding schools below the college level were counted at their parental home.

Persons in Institutions

Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where the institution was located. Patients in short-term wards of general hospitals were counted at their usual place of residence; if they had no usual place of residence, or if there was no one at their usual place of residence to report them, they were counted at the hospital.

Persons Away From Their Residence on Census Day

Persons in hotels, motels, etc., on the night of March 31, 1980 having their usual home within the area and who indicated that no one was at home to report them were enumerated as residents of the hotel, motel, etc. Information on persons away from their usual place of residence who indicated that someone was at home to report them was obtained from other members of their families, resident managers, neighbors, etc. If an entire household was away during the whole period of the enumeration, information on that household was obtained from neighbors.

In the Virgin Islands of the United States, the part of the procedures relating to the enumeration of persons staying in hotels and motels was not feasible because of the large number of guests in the islands during the local festivities that took place around Census Day. This should not have any significant effect in the total population counts, since persons staying at hotels and motels during this period were generally not residents of this area, and even if they were, someone at home would have reported them to a census taker.

Residents Abroad

Residents who were abroad for an extended period (in the U.S. Armed Forces, working at civilian jobs, studying in universities outside this Area, etc.) were not included in the population of the Virgin Islands of the United States. On the other hand, residents who were temporarily abroad on vacations, business trips, and the like, were counted at their usual residence in the Virgin Islands of the United States.

Persons from Other Areas

Persons from other areas, having their usual residence (legally or illegally) in the Virgin Islands of the United States on Census Day, including those working

here and those attending school (but not living at a chancellery or consulate), were included in the enumeration, as were members of their families living with them, regardless of citizenship. However, persons from other areas, temporarily visiting or traveling in the Virgin Islands of the United States, were not enumerated in the 1980 census.

DATA COLLECTION PROCEDURES

The 1980 census of the Virgin Islands of the United States was conducted through direct interview. Beginning on Census Day, April 1, 1980, enumerators visited and listed every housing unit asking the questions as worded on the questionnaire, and recording the answers. A single questionnaire contained all the questions asked of every person and at every housing unit.

Special questionnaires were used for the enumeration of persons in group quarters such as colleges and universities, hospitals, and prisons. These forms contained the same population questions that appeared on the regular census questionnaire but did not include any housing questions.

PROCESSING PROCEDURES

The 1980 census questionnaires were processed in a manner similar to that for the 1970 census. They were designed to be processed electronically by the Film Optical Sensing Device for Input to Computer (FOSDIC). For most items on the questionnaire, the information obtained by the enumerator was recorded by marking the answers in the predesignated positions that would be "read" by FOSDIC from a microfilm copy of the questionnaire and transferred onto computer tape with no intervening manual processing. Since some questions required the respondent to provide write-in entries which could not be read by FOSDIC, the questionnaires were processed through manual coding operations. Census Bureau coders assigned alphabetical or numerical codes to the write-in answers in FOSDIC readable code boxes on each questionnaire. After all coding was completed, the questionnaires were microfilmed and the film was "read" by FOSDIC and transferred onto computer tape for tabulation. The computer tape excluded information on individual names and addresses.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulating steps. Among the products of this operation were computer tapes from which the tables in this report (and most others in the 1980 census publications) were prepared on phototypesetting equipment at the Government Printing Office.

A more detailed description of the data collection and processing procedures can be obtained from the *1980 Census of Population and Housing, Users' Guide,* PHC80-R1.

Appendix D.—Accuracy of the Data

ERRORS IN THE DATA

Since 1980 population data shown in this report were tabulated from the entries for persons on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to enumerate every household or person in the population, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling error in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum.

EDITING OF UNACCEPTABLE DATA

The objective of the processing operation is to produce a set of statistics that describes the population as accurately and clearly as possible. To meet this objective, certain unacceptable entries were edited.

In the field, questionnaires were reviewed for omissions and certain inconsistencies by a census clerk or an enumerator and, if necessary, a follow-up was made to obtain missing information. In addition, a similar review of questionnaires was done in the central processing offices. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

As one of the first steps in editing, the configuration of marks on the questionnaire column was scanned electronically to determine whether it contained information for a person or merely spurious marks. If the column contained entries for at least two of the basic characteristics (relationship, sex, race, age, marital status, Spanish origin), the inference was made that the marks represented a person. In cases in which two or more basic characteristics were available for only a portion of the people in the unit, other information on the questionnaire provided by an enumerator was used to determine the total number of persons. Names were not used as a criterion of the presence of a person because the electronic scanning did not distinguish any entry in the name space.

If any characteristics for a person were still missing when the questionnaires reached the central processing office, they were supplied by allocation. Allocations, or assignments of acceptable codes in place of unacceptable entries, were needed most often when there was no entry for a given item or when the information reported for a person on that item was inconsistent with other information for the person. As in previous censuses, the general procedure for changing unacceptable entries was to assign an entry for a person that was consistent with entries for other persons with similar characteristics. Thus, a person who was reported as a 20-year-old son of the householder, but for whom marital status was not reported, was assigned the same marital status as that of the last son processed in the same age group. The assignment of acceptable codes in place of blanks or unacceptable entries, it is believed, enhances the usefulness of the data.

The 1980 census data on the economic questions such as industry, occupation, class of worker, work experience, and income were processed using an allocation system which assigned values to missing entries in these questions, as necessary, from a single respondent with similar socioeconomic characteristics.

Prior to the allocation of all economic variables, the computer records were sorted according to such characteristics as sex, race, household relationship, years of school completed, and geographic area. The actual allocation operation was implemented in the following manner:

1. The computer stored in a series of matrices reported economic information of persons by selected characteristics such as age, disability status, presence of children, veteran's status, employment status, occupation, industry, class of worker status, work experience in 1979, level of earnings in 1979, and value of property or monthly rent.
2. The stored entries in the various matrices were retained in the computer only until a succeeding person having the same set of characteristics was processed through the computer. Then the economic question responses of the succeeding person were stored in place of those previously stored.
3. When one or more of the economic questions was not reported, or the entry was unacceptable, the variables assigned to this person were those stored in the appropriate matrix for the last person who otherwise had the same set of characteristics.

The use of this single allocation system insured that the distribution of economic variable assignments would correspond closely to the entries of persons who had actually reported in the census.

Tables showing the allocation rates for selected social and economic characteristics will be issued at a later date.

BUREAU OF THE CENSUS WASHINGTON, D.C. 20233

1980 Census of Population and Housing

VIRGIN ISLANDS

TO THE ENUMERATOR:

1. Fill section A on this page.
2. Fill pages 1 through 4.
3. Fill a pair of facing pages for each person listed on pages 2 and 3.
4. Complete page 20.

Section A	
Location or address	
D.O.	A1. ED number
A4. Block number	A6. Housing unit serial number

Your answers are confidential

By law (title 13, U.S. Code), census employees are subject to fine and/or imprisonment for any disclosure of your answers. Only after 72 years does your information become available to other government agencies or the public. The same law requires that you answer the questions to the best of your knowledge.

Form D-80 VI

Form Approved: O.M.B. No. 41-S79065

Question 1

List in Question 1

- Family members living here, including babies still in the hospital
- Relatives living here
- Lodgers or boarders living here
- Other persons living here
- College students who stay here while attending college, even if their parents live elsewhere
- Persons who usually live here but are temporarily away (including children in boarding school below the college level)
- Persons with a home elsewhere but who stay here most of the week while working

Do Not List in Question 1

- Any person away from here in the Armed Forces.
- Any college student who stays somewhere else while attending college.
- Any person who usually stays somewhere else most of the week while working there.
- Any person away from here in an institution such as a home for the aged or mental hospital.
- Any person staying or visiting here who has a usual home elsewhere.

1. What is the name of each person who was living here on Tuesday, April 1, 1980, or who was staying or visiting here and had no other home?

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

Note

If everyone here is staying only temporarily and has a usual home elsewhere, please mark this box ☐.

Then please:

- ask the double underlined questions on pages 3 and 4 only,

  and
- enter the address of this household's usual home on page 20.

Please continue ↗

College *(academic year)*

1 2 3 4 5 6 7 8 or more

○ Never attended school — *Skip question 10.*

○ Now attending this grade *(or year)*
○ Finished this grade *(or year)*
○ Did not finish this grade *(or year)*

CENSUS USE ONLY A ○ I ○ N ○ ○

NOW PLEASE ANSWER QUESTIONS H1—H27 FOR YOUR HOUSEHOLD

H1. Did you leave anyone out of the list of persons living here because you were not sure if the person should be listed — *for example, a new baby still in the hospital, a lodger who also has another home, or a person who stays here once in a while and has no other home?*

○ Yes — *Determine whether to add person.* ○ No

H2. Did you list anyone in the list of persons living here who is away from home now — *for example, on a vacation or in a hospital?*

○ Yes — *Determine whether person should remain listed.* ○ No

H3. Is anyone visiting here who is not already listed?

○ Yes — *Determine whether to add person.* ○ No

H4. Do you enter your living quarters —

○ Directly from the outside or through a common or public hall?
○ Through someone else's living quarters?

H5. When did . . . *(insert name of person in column 1)* **move into this house (or apartment)?**

- ○ 1979 or 1980
- ○ 1975 to 1978
- ○ 1970 to 1974
- ○ 1960 to 1969
- ○ 1950 to 1959
- ○ 1949 or earlier
- ○ Lived here since birth

H6. Which best describes this building? *(Include all apartments, flats, etc., even if vacant.)*

- ○ A one—family house detached from any other house
- ○ A one—family house attached to one or more houses
- ○ A building for 2 families
- ○ A building for 3 or 4 families
- ○ A building for 5 to 9 families
- ○ A building for 10 to 19 families
- ○ A building for 20 to 49 families
- ○ A building for 50 or more families ■
- ○ A mobile home or trailer
- ○ Boat
- ○ Tent, van, etc.

H7. About when was this building originally built? *Mark when the building was first constructed, not when it was remodeled, added to, or converted.*

- ○ 1979 or 1980
- ○ 1975 to 1978
- ○ 1970 to 1974
- ○ 1960 to 1969
- ○ 1950 to 1959
- ○ 1940 to 1949
- ○ 1939 or earlier

H8. How many rooms do you have in your living quarters? *Do not count bathrooms, porches, balconies, halls.*

- ○ 1 room
- ○ 2 rooms
- ○ 3 rooms
- ○ 4 rooms
- ○ 5 rooms
- ○ 6 rooms
- ○ 7 rooms
- ○ 8 rooms
- ○ 9 rooms or more

H9. Do you get your water from —

- ○ A public system?
- ○ A cistern, tanks or drums?
- ○ A public standpipe or street hydrant?
- ○ Some other source *(individual well, spring, river, etc.)?*

H10. Did you purchase any water from a water vendor during the past year?

○ Yes ○ No ■

H11. Is there hot and cold piped water in this building?

- ○ Yes, hot and cold piped water in this building
  - **What type of energy does your water heater (tank type) use most?**
  - ○ Electricity ○ Other fuels
  - ○ Solar energy
- ○ No, only cold piped water in this building
- ○ No piped water in this building

H12. Is there a bathtub or shower in this building?

- ○ Yes, for this household only
- ○ Yes, but also used by another household
- ○ No bathtub or shower

H13. Is there a flush toilet in this building?

- ○ Yes, for this household only
- ○ Yes, but also used by another household

Is the toilet flushed with: ○ Salt water? ○ Fresh water?

○ No → *If "No,"* **what type of toilet?**

- ○ Outhouse or privy
- ○ Other or none ■

H14. Is this building connected to a public sewer?

- ○ Yes, connected to public sewer
- ○ No, connected to septic tank or cesspool
- ○ No, use other means

H15. Is there a refrigerator in your living quarters?

○ Yes ○ No

H16. Do you have air conditioning?

- ○ Yes, a central air-conditioning system
- ○ Yes, 1 individual room unit
- ○ Yes, 2 or more individual room units
- ○ No ■

FOR CENSUS USE

A4. Block number ■

A6. Serial number

B. Type of unit or quarters

Occupied ■
- ○ First form
- ○ Continuation

Vacant
- ○ Regular
- ○ Usual home elsewhere

Group quarters
- ○ First form
- ○ Continuation

For Vacant Units

C1. Is this unit for —
- ○ Year round use
- ○ Seasonal — *Skip C2, C3, and D.*

C2. Vacancy status ■
- ○ For rent
- ○ For sale only
- ○ Rented or sold, not occupied
- ○ Held for occasional use
- ○ Other vacant

C3. Is this unit boarded up?
○ Yes ○ No

D. Months vacant
- ○ Less than 1 month
- ○ 1 up to 2 months
- ○ 2 up to 6 months
- ○ 6 up to 12 months
- ○ 1 up to 2 years
- ○ 2 or more years

E. Indicators ■

○ ○ Pop./F

○ ○

F. Total persons

Page 4

ANSWER THESE QUESTIONS

H17. How many automobiles, vans, or light trucks are kept at home for use by members of your household?
(Include company – owned vehicles kept at home.)

- ○ None
- ○ 1 automobile, or truck, or van, etc.
- ○ 2 automobiles, or trucks, or vans, etc.
- ○ 3 or more automobiles, or trucks, or vans, etc.

H18. Which fuel is used most for cooking?

- ○ Gas: bottled or tank
- ○ Electricity
- ○ Fuel oil, kerosene, etc.
- ○ Wood
- ○ Other fuel
- ○ No fuel used

H19. What are the costs of utilities and fuels for your living quarters?

a. Electricity

$ _____ .00 OR ○ Included in rent or no charge
Average monthly cost ○ Electricity not used

b. Gas

$ _____ .00 OR ○ Included in rent or no charge
Average monthly cost ○ Gas not used

c. Water

$ _____ .00 OR ○ Included in rent or no charge
Average monthly cost

d. Fuel oil, kerosene, etc.

$ _____ .00 OR ○ Included in rent or no charge
Yearly cost ○ These fuels not used

H20. Is this apartment (house) part of a condominium?

○ Yes ○ No

H21. Are your living quarters —

- ○ Owned or being bought by you or by someone in this household?
- ○ Rented for cash rent?
- ○ Occupied without payment of cash rent?

H22. *Ask of persons who rent their living quarters —*
What is the monthly rent? *If rent is not paid by the month, see the Questionnaire Reference Book on how to figure monthly rent.*

- ○ Less than $50
- ○ $50 to $59
- ○ $60 to $69
- ○ $70 to $79
- ○ $80 to $89
- ○ $90 to $99
- ○ $100 to $109
- ○ $110 to $119
- ○ $120 to $129
- ○ $130 to $139
- ○ $140 to $149
- ○ $150 to $159
- ○ $160 to $169
- ○ $170 to $179
- ○ $180 to $189
- ○ $190 to $199
- ○ $200 to $224
- ○ $225 to $249
- ○ $250 to $274
- ○ $275 to $299
- ○ $300 to $349
- ○ $350 to $399
- ○ $400 to $499
- ○ $500 or more

H23. *If this is a one-family house —*

a. Is this house on a property of 3 or more acres?

○ Yes ○ No

b. Is any part of the property used as a commercial establishment or medical office?

○ Yes ○ No

H24. *If this is a one-family house or a condominium unit which is owned or is being bought —*
What is the value of this property, that is, how much do you think this property *(house and lot or condominium unit)* **would sell for if it were for sale?** *Do not ask this question if this is —*

- **A mobile home or trailer**
- **A house on 3 or more acres**
- **A house with a commercial establishment or medical office on the property**

- ○ Less than $10,000
- ○ $10,000 to $14,999
- ○ $15,000 to $17,499
- ○ $17,500 to $19,999
- ○ $20,000 to $22,499
- ○ $22,500 to $24,999
- ○ $25,000 to $27,499
- ○ $27,500 to $29,999
- ○ $30,000 to $34,999
- ○ $35,000 to $39,999
- ○ $40,000 to $44,999
- ○ $45,000 to $49,999
- ○ $50,000 to $54,999
- ○ $55,000 to $59,999
- ○ $60,000 to $64,999
- ○ $65,000 to $69,999
- ○ $70,000 to $74,999
- ○ $75,000 to $79,999
- ○ $80,000 to $89,999
- ○ $90,000 to $99,999
- ○ $100,000 to $124,999
- ○ $125,000 to $149,999
- ○ $150,000 to $199,999
- ○ $200,000 or more

Please ask H25–H27, if this is a one-family house which is owned or being bought, unless this is —

- **A CONDOMINIUM UNIT**
- **A mobile home or trailer**
- **A house on 3 or more acres**
- **A house with a commercial establishment or medical office on the property**

If any of these, or if this is a multi-family structure, skip H25 to H27 and turn to page 6.

H25. What were the real estate taxes on this property last year?

$ _____ .00 OR ○ None

H26. What is the annual premium for fire and hazard insurance on this property?

$ _____ .00 OR ○ None

H27a. Do you have a mortgage or similar debt on this property?

- ○ Yes, mortgage or similar debt
- ○ No,—*Skip to page 6.*

b. Do you have a second or junior mortgage on this property?

○ Yes ○ No

c. How much is your total regular monthly payment to the lender?
Also include payments to lenders holding second or junior mortgages on this property.

$ _____ .00 OR ○ No regular payment required — *Skip to page 6.*

d. Does your regular monthly payment *(amount entered in H27c)* **include payments for real estate taxes on this property?**

- ○ Yes, taxes included in payment
- ○ No, taxes paid separately or taxes not required

e. Does your regular monthly payment *(amount entered in H27c)* **include payments for fire and hazard insurance on this property?**

- ○ Yes, insurance included in payment
- ○ No, insurance paid separately or no insurance

ANSWER THESE QUESTIONS FOR

Name of Person 1 on page 2

Last name | First name | Middle initial

11. Where was . . . born? *If born in a hospital, give residence of the mother, not location of hospital. Fill one circle.*

Born in:

- ○ Virgin Islands of the United States
- ○ Puerto Rico
- ○ United States
- ○ Other — *Specify*

Name of country

12. *If this person was born in a foreign country —*

a. Is . . . a naturalized citizen of the United States?

- ○ Yes, a naturalized citizen
- ○ No, not a citizen
- ○ Born abroad of American parents

b. When did . . . come to the Virgin Islands to stay?

- ○ 1975 to 1980
- ○ 1970 to 1974
- ○ 1965 to 1969
- ○ 1960 to 1964
- ○ 1950 to 1959
- ○ Before 1950

13a. In what country was . . .'s father born?

- ○ Virgin Islands of the United States
- ○ Puerto Rico
- ○ United States
- ○ Other — *Specify*

Name of country

b. In what country was . . .'s mother born?

- ○ Virgin Islands of the United States
- ○ Puerto Rico
- ○ United States
- ○ Other — *Specify*

Name of country

14a. Does . . . speak a language other than English at home?

- ○ Yes
- ○ No, only speaks English—*Skip to 15a*

b. What is this language?

(For example — French, Italian, Spanish, etc.)

c. How well does . . . speak English?

- ○ Very well
- ○ Not well
- ○ Well
- ○ Not at all

15a. Did . . . live in this house five years ago (April 1, 1975)? *If in college or Armed Forces in April 1975, report place of residence there.*

- ○ Born April 1975 or later — *Turn to next page for next person*
- ○ Yes, this house — *Skip to 16a*
- ○ No, different house

b. Where did . . . live five years ago (April 1, 1975)?

- ○ St. Thomas
- ○ St. Croix
- ○ St. John
- ○ United States
- ○ Other

Specify

U.S. State or foreign country

16a. At any time during the last 10 years has . . . lived outside the Virgin Islands of the United States for 6 or more consecutive months?

- ○ Yes
- ○ No— *Skip to 17*

b. When did . . . come or return to the Virgin Islands (the last time)?

- ○ 1979 or 1980
- ○ 1978
- ○ 1976 or 1977
- ○ 1975
- ○ 1973 or 1974
- ○ 1970 to 1972

c. Where did . . . live just before coming (or returning) to the Virgin Islands the last time?

- ○ United States
- ○ Puerto Rico
- ○ British V.I. *(Tortola, Gorda, etc.)*
- ○ Trinidad & Tobago
- ○ Antigua
- ○ St. Kitts
- ○ Other — *Specify*

d. How long did . . . live in that place (16c) the last time?

- ○ 6 months up to 1 year
- ○ 1 to 2 years
- ○ 3 to 4 years
- ○ 5 years
- ○ 6 to 9 years
- ○ 10 or more years

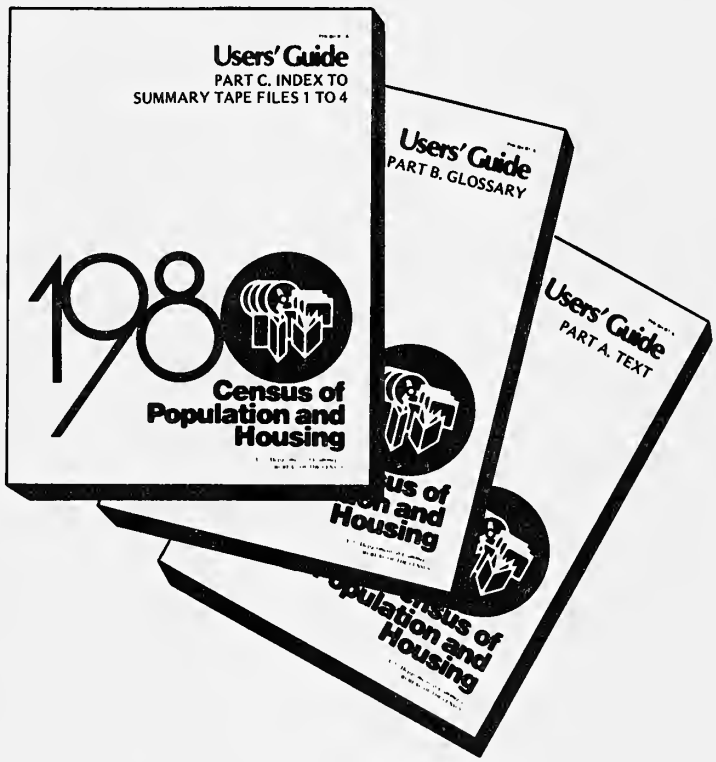
1980 Census of Population and Housing

Users' Guide

The Users' Guide, a reference work on the 1980 census, is now available. It consists of:

- Part A. Text—Covers census data subjects; geographic considerations; reports, tapes, maps, and other products; services available to users; and many other topics.
- Part B. Glossary—Provides detailed definitions of population, housing, geographic, and technical terms.
- Part C. Index to Summary Tape Files 1 to 4—Provides an index, subject-by-subject, to the hundreds of tables in the four major summary tape series. Tells which tables have the desired data and also provides complete descriptions for all tables in these STFs.
- Sources of Assistance—Furnishes addresses and phone numbers of public and private sector organizations offering a variety of products and services, such as tape processing, area profiles, training, and reference assistance.
- Updates—Provide "Part A. Text" revisions on new developments relating to the 1980 census.

Other parts, including an index to reports, are planned for publication later.



Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Specify the stock numbers (S/N) given below and make check payable to Superintendent of Documents.

Part A. Text (S/N 003-024-03625-8)—$5.50
Part B. Glossary; Sources of Assistance; and Updates
(Supplement 1) (S/N 003-024-05004-8)—$6.00
Part C. Index to Summary Tape Files 1 to 4
(Supplement 2) (S/N 003-024-05771-9)—$4.25
